USB 3.0 Dual Docking Station (sd3500v)

K33972EU

Product Description

Ultrabooks and other super slim laptop computers are long on sleek good looks. But they usually come up short on ports for connectivity. As a result, you're constantly plugging and unplugging peripherals to connect to the devices you need. That's where the Kensington USB 3.0 Dual Docking Station comes in. It turns one USB port into six so that with one hot swappable USB connection you'll have access to all of your peripherals, including printer, external drive, scanner, keyboard & mouse, audio 2.0 speakers and even two 1080HD video monitors. Nothing can boost productivity like a second monitor, and the Kensington USB 3.0 Dual Docking Station makes adding two big beautiful HD monitors as easy as connecting a single USB plug. What's more, the Dock's USB 3.0 ports allow super-speed data transfer of up to 5 Gbps and are backward compatible with UBS 2.0. The USB 3.0 Dual Docking Station gives you a big productivity boost without taking up a lot of desktop space or sacrificing aesthetics. It features a slim design that complements today's Ultrabooks perfectly. There's even a security slot that accepts any laptop lock. Turn your Ultrabook or super slim laptop into a productivity machine with the Kensington USB 3.0 Dual Docking Station.

Features

- Optimized for Ultrabooks to turn one USB port into 6

- DVI to VGA and DVI - HDMI conversion for greater monitor compatibility

- Quick one-touch USB connection for hassle-free setup

- Corporate Install feature allows administrators to install the graphic driver over a MicroSoft® server
