<sup>1</sup> Screen sizes for Pixel devices are measured diagonally as a rectangle. Actual viewable area is less. Dimension may vary by configuration and manufacturing process. <sup>2</sup> Coming soon. <sup>3</sup> Estimated battery life based on testing using a median Pixel user battery usage profile across a mix of talk, data, standby, and use of other features. Battery testing conducted on a major U.S. carrier network in California in early 2024 on pre-production hardware and software using default settings. Tests began with phones fully charged. Battery life depends upon many factors and usage of certain features will decrease battery life. Actual battery life may be lower. <sup>4</sup> Wireless charging rates up to 23W charging with Google Pixel Stand (2nd gen). Up to 12W with Qi-certified EPP chargers (sold separately). Actual results may be slower. <sup>5</sup> Designed to charge Qi-certified devices. Use of reverse wireless charging significantly reduces Pixel battery life. Cases may interfere with charging and will reduce charging speed. Charge speeds may vary. See [g.co/pixel/wirelesscharging](https://g.co/pixel/wirelesscharging) for more information. <sup>6</sup> Pixel 9 and Pixel 9 Pro are designed to comply with dust and water protection rating IP68. Pixel 9 Pro Fold is designed to comply with rating IPX8, all under IEC standard 60529. Water resistance and dust resistance are not permanent conditions and will diminish due to normal wear or damage. Liquid damage voids the warranty. See [g.co/pixel/water](https://g.co/pixel/water) for details.
