Neomounts

We are committed to making product choices that are sustainable and rely on the recyclability of our products. Investing in a circular economy where sustainability is at the heart of everything we do. A sustainable approach is essential in

Environmental footprint

addressing global climate change.

Greenhouse gasses emitted into the environment during production of a product contribute directly to our planet's global warming.

Using LCA software¹ we are able to calculate² the (potential) environmental footprint, measured in kilograms CO₂-equivalent. This enables us to evaluate a product's footprint and support the design of sustainable products.

By recycling our products the impact on the environment can be reduced as the recycled material replace the need to produce virgin materials.

Monitor arm desk mount

Neomounts

Steel	48,5%
Aluminium	48,5%
ABS	1,0%
PA	0,8%
POM	0,6%
Other	0,7%

Emitted carbon dioxide

To illustrate the effect of a kilogram carbon dioxide, we converted it to kilometres driven by a car.

Without recycling

60,2 kg CO₂ 182 km*

With recycling

36,22 kg CO₂ 110 km*
