# LIGEL

**Vision** 

To transform the way the world works, providing better outcomes for people, organizations and the planet.

## Focus

To provide a hardware agnostic, purpose-built OS for VDI, DaaS, and digital workspaces that empowers people to thrive within hybrid work environments using any device. The ultimate endpoin OS for virtual apps and desktops is easy to manage, helps save time and money, and supports "green energy initiatives.

### Our **Solutions** Offer

To manage endpoints for the work from anvwhere era

#### SECURE

Workspaces with endpoint security built in

#### **RICH**

**Employee** experiences with support for unified communications

### **IGEL OS**

The most secure, high performance, managed endpoint operating system, purpose built for any cloud.

- Platform independent Linux. built-in enterprise level security
- o Read-only, modular, easy configuration
- Advanced multimedia for unified communications and graphics-intensive workloads
- Vast partner ecosystem of integrated technologies supporting numerous peripherals, protocols and ecosystem solutions

#### **Use Cases:**

#### **Our Unified Communications**

IGEL OS enables high-fidelity collaboration, optimized for MS Teams, WebEx, and Zoom

#### Hvbrid Work

Securely navigate company apps and data from any location with an internet connection

#### Use Your Device of Choice

Simply boot IGEL OS on your PC, laptop or any compatible device with IGEL UD Pocket

#### o Don't Miss a Beat

Gain on-demand access to your workspace with IGEL OS, a core element of your business continuity plan

### **Universal Management** Suite (UMS)

#### Efficient, enterprise-scale management and control

- Easy management & control
- Scale to many thousands of endpoints (up to 300,000)
- HA for non-stop operation
- REST API for the integration of interactive applications
- Custom devices, applications, and protocols support
- O UMS WEB APP offers Web functionality for helpdesk and device management

#### **SHARED WORKPLACE**

**Profile-based administration** per job role/function, enables the sharing of devices among multiple users

#### **IGEL CLOUD GATEWAY**

Manage and control remote off-network endpoints

#### **ASSET INVENTORY TRACKER** Peripheral device insight

to view info and status of attached peripheral devices

### **Secure By Design**

**Built-in and proactive security protects your business** 

#### Secure Work from Anywhere

No data is stored on the device, read-only files, a small attack surface

#### **O Remote IT Management**

Configure, customize, update or lockdown devices according to user role

#### **O Multi-factor Authentication**

Secure access to workspace with integrated single sign-on technologies Infrastructure at Kaleida Health

"IGEL OS has improved the stability of our endpoints, enabled secure access to \$2 million in saving over the next three

- Kevin Conable, Director, IT

#### **IGEL CHAIN OF TRUST**

#### **End-to-end system integrity for IGEL OS**

A sequence of verifications unlock each step of the boot up process, up to the digital workspace VDI host or cloud.

### **Choose Your Endpoint Device, Add IGEL OS**

Instantly transform the PCs, laptops or thin clients you already have into a secure and easy to manage endpoint device for VDI, DaaS and digital

**IGEL** Ready certified endpoint devices

### **IGEL UD Pocket**

- Secure and rapid access to company apps, data and workflows from anywhere
- o Boot IGEL OS on the devices you already
- Provides rapid access to workspace in Disaste recovery scenario

### Sustainable **IT With IGEL OS**

Achieve your sustainability goals, optimize your IT resources with IGFL OS by:

- o reusing the hardware you have
- o building on your infrastructure
- o enabling secure hybrid work
- o slashing emissions by 40%
- o reducing costs by 55%

### **Integrated Technologies**

Over 130 IGEL Ready technology partners have integrated their products with IGEL OS.

### **Industry Impact**

#### Healthcare

Meet GDPR. HIPAA. PCI and other compliance requirements by turning any x86-64 device into a highly controlled, secure endpoint and support a broad range of single sign-on, authentication and other peripheral devices.

#### Finance/Insurance

Achieve maximum security and control by turning your PCs, laptops, thin clients and hand-held x86-64 devices into fully controlled, easily managed endpoints from a single console.

#### Manufacturing

Enhanced endpoint security and control for front office, back office and shop floor.

#### **Higher Education**

Ensure desktop and user experience consistency across all your user devices, even BYOD, while extending the life of your aging PCs and laptops, from classrooms to labs to administrative offices, easily managed from a single console.

#### Government

Minimize the threat of malware and viruses by moving Windows desktops into the secure data center and replacing Windows endpoints with Linux-based endpoints. Extend the useful life of older x86-64 devices.

#### Retail

IGEL OS helps IT administrators overcome many of the pressing challenges in retail. Rapid store provisioning and remote global call-center management is easy from one console. IGEL's proactive security helps in maintaining payment card industry (PCI) data protection compliance.

#### Request a 12 min demo

An IGEL engineer will walk you through the system.
