What Is tenfold?

tenfold is the leading Identity and Access Management solution for mid-market organizations. We make sure your users get access to the data they need – but only for as long as they need it.

Advantages at a glance

Better Cybersecurity

Role-based access management and periodic access reviews mitigate the risk of data breaches and other security incidents.

Higher Productivity

Save time and money with automated user management, workflows, self-service access requests and item-level permission reporting.

Achieve Compliance

Change tracking and data ownership help you stay in line with regulations like GDPR, CCPA, ISO 27001, PCI-DSS, HIPAA and more.

Integration

tenfold offers a wide range of plugins allowing you to integrate systems from major vendors as well as custom applications.

Why Choose tenfold?

tenfold's mid-market focus makes it the best choice for medium-sized organizations and a better fit than data governance tools aimed at small businesses or enterprise solutions for large and complex corporations.

	Data Governance	Enterprise Solutions	tenfold
Features	✗ Limited management capabilities, zero flexibility	✗ Excessive scope, highly complex	✓ All-in-one solution for mid-market companies
Implementation Time	✗ No flexibility – short implementation time	✗ Long & complicated projects, months to years	✓ Up and running within days
Third-Party Support	✗ None	✗ Difficult setup, requires custom programming	✓ Easy integration with cloud & on-prem services
Costs	✗ Inexpensive at first glance, but considerable hidden costs	✗ High initial costs, soaring operational expenses	✓ Flexible subscription options & low implementation costs

Features

Identity & Access Management

Manage user accounts and access rights easily and securely through a central, automated platform.

Role-Based Access Control

Define default permissions based on department, position or other attributes to ensure appropriate access for all users.

Self-Service & Workflows

Empower users and free up your IT staff with self-service access requests and customizable approval workflows.

User Access Reviews

Periodic access reviews by data owners prevent privilege creep and help reduce the risk of data breaches.

Change Tracking

Always know who had access to what, when and why thanks to detailed change-tracking and audit-proof logs.

Data Owners

Assign data owners for specific resources to manage access, respond to requests and conduct reviews.

Watch our demo

www.tenfold-security.com/en/tenfold-demo

The screenshot displays the tenfold web interface for analyzing file server permissions. The main table shows a list of file servers with columns for File server, Properties, Count, and Size. The 'P112_Skydrive' folder is highlighted in yellow, indicating it is selected. A play button is overlaid on the screenshot. Below the screenshot is a QR code linking to the demo.

File server	Properties	Count	Size
Projects		76 (100.0%)	0 Byte (0.0%)
P110_Plans		2 (18.2%)	0 Byte (0.0%)
P111_Moonshot		2 (18.2%)	0 Byte (0.0%)
P112_Skydrive		3 (27.3%)	0 Byte (0.0%)
Documents		0 (0.0%)	0 Byte (0.0%)
Meetings		0 (0.0%)	0 Byte (0.0%)
Planning		0 (0.0%)	0 Byte (0.0%)
P133_Upgrade		2 (18.2%)	0 Byte (0.0%)
P144_Rollouts		2 (18.2%)	0 Byte (0.0%)
Organization		26 (100.0%)	0 Byte (0.0%)
Sharing		0 (0.0%)	0 Byte (0.0%)
