ACCESSORIES AND FEATURES

Build-in battery

Built-in Battery

With the battery integrated in the projector, you can project anytime and anywhere.

You do not need a power cable or a nearby socket, and the signal cable is completely eliminated.

Enjoy complete movies or hold various presentations without having to charge the battery or carry any cables.

Automatic Keystone Correction

Thanks to the automatic vertical keystone correction, the Acer projector automatically compensates for trapezoidal distortion if the projector is not positioned exactly vertically and projects a rectangular image.

360° Projection

360 degree projection

The 360° projection offers you highest flexibility and allows you to use the projector in all positions as well as to realize interesting installations. For example, you can project from the deck of the room onto the floor or a table, or mount the projector on its side to project upright.

Acer Smart Format Technology

SmartFormat

Acer SmartFormat technology supports a wide range of input signals, eliminating the need for switching on your notebook/PC, DVD player and receiver. Signals up to 1080p can be received by Acer ColorBoost projectors with HDMI* using Acer SmartFormat technology and can be played back in compressed form.

Instant Pack

INSTANT PACK

InstantPack guarantees the lamp safety of Acer ColorBoost projectors. The current lamps from renowned manufacturers such as Osram and Philips are not damaged in the event of a sudden loss of power. (Acer recommends that the projector be powered until the fan stops) The lamp warranty is 1 year with no hour limit.

Power Bank

Power Bank

Use your projector not only in its traditional way, but also simply as a power bank. For example, you can charge your smartphone via the projector.

Especially on the road you don't want to do without this feature!
