INFORMATION

19” Open Frame touchscreen monitor with edge-to-edge glass and Touch Through-Glass function for flexible integration

The ProLite TF1934MC-B8X is a 19” Open Frame touchscreen monitor designed for integration into kiosks, retail systems, interactive displays and custom installations. Its 10-point PCAP touch technology provides accurate multi-touch operation, while the edge-to-edge glass surface offers durability, scratch resistance and a clean, professional appearance.

With IP65-rated front protection, the screen is resistant to dust and splashing water from the front, making it suitable for demanding public and commercial environments. The anti-fingerprint coating helps keep the display clear and easy to use, even with frequent interaction.

For applications requiring additional protection, the Touch Through-Glass function allows reliable touch operation through a glass overlay up to 6 mm. The monitor can be installed in landscape, portrait or face-up orientation, while optional Open Frame mounting brackets support easy and secure integration into different installation designs.

For ease of integration, the monitor can be equipped with optional external mounting brackets (OMK1-1).

FEATURES

Touch works. Glass protects.

The display remains fully touch-responsive even when installed behind a protective glass layer. Ideal for kiosks, parcel lockers, self-service terminals and other public-facing installations where durability matters.

Reliable where conditions get tough

IP65 protection helps the monitor withstand dusty conditions and splashing water from any direction, making it suitable for more demanding environments.

Versatile by design

From wall-mounted interfaces to counter-based interaction, the monitor supports landscape, portrait and face-up installation, giving integrators more freedom to create intuitive touch solutions.

Open frame brackets

For ease of integration, the monitor can be equipped with optional external mounting brackets.
