TÜV certification

The TÜV certification is globally recognized as proof of safety and quality, ensuring products have been rigorously tested for safety and comply with the relevant technical and safety requirements. This includes documentation review, performance assessment and (laboratory) testing. An over-load test with 5 times the allowed maximum weight is part of this testing process.

TÜV conducts regular inspections, to ensure products initially tested and certified by TÜV continue to be produced with consistent quality. Included are production inspections, supplier assessment and pre-delivery inspections.

As an independent body, TÜV certification serves as acknowledgement of quality and reliability.

Neomounts is part of the Global Mounts Group; a partnership of Neomounts and B-Tech AV Mounts with the most extensive portfolio and worldwide distribution.
