

## Product Messaging and Information

# 3Dconnexion Numpad Pro (stand-alone)

Product	Numpad Pro
Document	Product Copy Master Document (PCMD)
Category	Keyboard
Language	EN

Part-Nr.	3DX-700105
EAN	4260016341344
UPC	82112370105

## Product Name with Tag Line

**3Dconnexion Numpad Pro – Designed for professionals**

## Product Copy – Short

The wireless 3Dconnexion Numpad Pro is designed to improve and accelerate your workflow. The programmable 3Dconnexion keys recognize and adapt instantly to your applications and turn the numpad into the perfect companion for your laptop, compact keyboard and SpaceMouse.

## Product Copy – Mid-Length

The 3Dconnexion Numpad Pro is engineered to ease working with numbers. The wireless numpad not only improves and accelerates your workflow, but also enables you to have a better comfort. The 3Dconnexion keys recognize and adapt instantly to your apps, and the additional customizable keys for your formulas turn the numpad into the perfect companion for your laptop, compact keyboard and SpaceMouse.

Ergonomically shaped, concave keycaps allow for precise, effortless typing. With matte-coated surfaces and rounded edges, they provide a pleasant feel. Your comfort is further enhanced by the advanced wrist support, thanks to the full-sized palm rest, and the optional foldout feet. When it comes to connectivity, the wireless numpad can be easily connected to your computer via Bluetooth or cable, or via the

embedded receiver if you own a 3Dconnexion Keyboard Pro. No matter how you connect your numpad, the communication will always be encrypted and thereby meet the stringent demands of enterprise security.

## **Product Copy - long**

The wireless 3Dconnexion Numpad Pro is designed to improve and accelerate your workflow. The programmable 3Dconnexion keys recognize and adapt instantly to your applications and turn the numpad into the perfect companion for your laptop, compact keyboard and SpaceMouse.

### **3Dconnexion keys that adapt to your apps**

The 3Dconnexion Numpad Pro integrates seamlessly into your work routine. Four dedicated programmable function keys give you instant access to application-specific commands. They are located above the standard keys, and instantly recognize the applications you are using, as well as their environments. Popular commands are automatically assigned to the keys and you can also easily personalize them according to your preferences. An on-screen display provides a convenient visual reminder of the assigned commands.

### **Customizable keys for your formulas**

In addition to the four application-specific 3Dconnexion keys, the numpad features five customizable arithmetic operator keys to help you enter calculations and formulas. Together with the decimal operator, which you can specify as either a point or a comma depending on the application, this makes your numpad the perfect tool for entering data and formulas.

### **Better posture. Better workflow.**

Place the numpad on your desk where it best suits your current workflow. Use your mouse and the Numpad Pro simultaneously to reduce the frequency and distance your hand travels between mouse and keyboard. This allows for a more efficient, relaxed and ergonomic position while working.

### **Advanced wrist support**

With its full-sized palm rest, the 3Dconnexion Numpad Pro provides the support you need for reduced wrist fatigue. Its exceptionally slim design allows you to position the numpad flat on the desk for a relaxed and easy typing. Foldout feet enable you to adjust the numpad to an angle of 4.3 degrees, if you prefer.

### **Precise and effortless typing**

The numpad features ergonomically shaped concave keycaps that fit the fingertips. With matte-coated surfaces and rounded edges, they provide a pleasant feel as well as accuracy regardless of where you strike the key. The keys offer stability coupled with minimal resistance, thanks to their advanced scissor technology. The keycaps are laser-etched, ensuring that the printing does not wear off.

### **Secure connectivity**

The wireless numpad can be easily connected to your computer via Bluetooth or cable. In addition, owners of the Keyboard Pro have the option to securely connect the numpad to their computer via the keyboard's integrated receiver. No matter how you connect your numpad, the communication will always be encrypted and thereby meet the stringent demands of enterprise security. The integrated rechargeable battery lasts for over six months\* before it needs to be charged again.

\*Battery life based on 8 hours per day, 5 days per week. Battery life may vary depending on settings and user.

## **Features and Functions**

- 4 programmable 3Dconnexion keys
- 5 customizable arithmetic operator keys
- Application-specific decimal separator
- Ergonomically shaped keycaps with advanced scissor technology
- Full-sized palm rest and foldout feet
- Encrypted Wireless connection
- Long battery lifespan due up to 6-months charging cycle (2 cycles per year)

## **Connectivity**

3Dconnexion® 2,4GHz Encrypted Wireless Technology (compatible with Keyboard Pro)  
Bluetooth® Low Energy (encrypted)  
Cable (USB-C)

## **Dimensions & Weight**

Width: 114 mm / 4.5"

Depth: 229 mm / 9.0"

Height: 16 mm / 0.6"

Weight: 250 g / 0.55 lb / 8.8 oz

## Battery

Battery life 6 months\*

Rechargeable lithium polymer with 350 mAh

\*Battery life based on 8 hours per day, 5 days per week. Battery life may vary depending on settings and user.

## Supported Operating Systems

Microsoft Windows
