## ARTICONA iPad 11 Edu Rugged Keyboard Case

Article number: 4989999

The ARTICONA Edu Rugged Keyboard Case is designed to provide reliable protection and enhanced productivity for the iPad in demanding environments such as education, field work and everyday professional use.

The rugged protective case is made from a combination of shock-absorbing TPU and silicone materials, helping to protect the device from impacts, bumps and daily wear.

The case meets the MIL-STD-810H standard for drop protection, making it suitable for environments where devices are frequently transported or shared.

An integrated keyboard with German layout allows comfortable and efficient typing, while dedicated iPadOS shortcut keys provide quick access to commonly used system functions.

The keyboard connects via USB-C, ensuring a stable connection without the need for Bluetooth pairing.

For additional convenience, the case includes a built-in pen holder to securely store a stylus when not in use.

The auto wake and sleep function helps conserve battery life, while the magnetic closure keeps the case securely closed during transport.

An integrated ID window on the back allows easy device identification, which is particularly useful in schools, organisations or large device deployments.

### Highlights

- Rugged keyboard case designed for demanding environments
- Shock-absorbing TPU + silicone construction
- MIL-STD-810H drop protection
- German keyboard layout with dedicated iPadOS shortcut keys
- USB-C connection, no Bluetooth pairing required
- Integrated pen holder
- Auto wake & sleep function
- Magnetic closure
- Integrated ID window for device identification
- Colour: Black
