Cost ↓ Productivity ↑ UX ↑

Solution availability may vary by country or model

For Frontline Workers

Quick and Easy to Scan

Quickly launch the scanner app

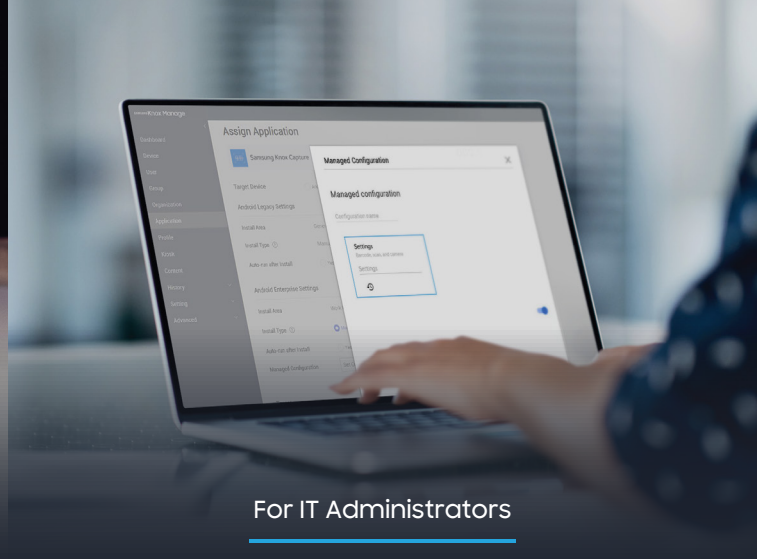
Push the remapped hardware key or the keyboard wedge to start scanning right away

Advanced scanning at your fingertips

Scan multiple targets in a single sequence with various multi-scanning modes and advanced formatting

Short learning curve

Scan barcodes just like you are taking pictures with your smartphone



For IT Administrators

Deploy and Configure Effortlessly

Easily configure scanning settings

Download “Knox Capture” app from Google Play on the admin device to set up profiles

Tailor scan settings for each business app

Set up unique scanning configurations for each application you use for work

- No need for integration between your work app and the SDK

Deploy in bulk over-the-air

Remotely install and configure Knox Capture app with your own scanner configurations using your EMM/MDM
