# Logitech Rally Camera Streamline Kit

A comprehensive USB PTZ video solution

### In Session. Everywhere.

The Logitech Rally Camera Streamline Kit is a comprehensive USB PTZ video solution for hyflex learning. Educators can direct the teaching flow by switching views from the camera with wireless preset buttons. A category cable can connect and power the camera up to 100 meters away from AV equipment with simplified deployment.

### Meet Logitech Rally Camera Streamline Kit

- **Showcase different views:** Presenters can easily switch to different preset views using intuitive wireless buttons placed in context around the room, enabling them to stay in the flow while presenting and delivering an engaging experience for viewers.
- **Seamless integration:** Seamlessly integrates with most operating systems, video conferencing and video capture platforms leveraging Rally Camera.

**logitech** for education

**Clean and simple installation:** Easy to install with flexible wall and ceiling mounting. Secure “twist-to-lock” interface designed to ensure all connections remain secure and cabling is hidden. The single-cable solution offers clean and lower-cost installation using a category cable with no need for a power outlet near the camera itself.

**Easy IT management:** When used with Logitech Sync, enables better remote management and control of devices and spaces.

**Ideal for hyflex learning:** Enables easy and optimal lecture capture of educator and content views, delivering an effective learning experience for students.

## Why it matters

Research suggests when instructors appear in videos and students can clearly see body language cues and eye contact, there is better student engagement.<sup>1</sup>

Experts highlight the importance of integrating video to provide opportunities for students to connect during hybrid learning. This can help students feel a greater sense of belonging and continue to develop social-emotional skills even when not in the classroom.<sup>2</sup>

71% of undergraduate students believe a hybrid/blended course format provides a quality learning experience.<sup>3</sup>

46% of students report difficulty maintaining engagement in hybrid learning environments when visual and audio quality is poor.<sup>4</sup>
