## Know Your IT with Lansweeper

IT departments are under tremendous pressure to maintain and support ever-expanding and increasingly complex IT environments. Ensuring security and business continuity, all while optimizing costs is more challenging than ever.

**Lansweeper empowers IT professionals to take control by building an always-accurate, detailed, and reliable IT Asset Inventory, providing complete visibility across the entire IT estate.** Every rogue device that briefly touches the network, every piece of shadow IT, every forgotten and idle device, Lansweeper will discover, identify, and deliver the data for you to take action.

Seamlessly integrate Lansweeper with industry-leading IT solutions to confidently face any IT challenge. Use Lansweeper's ready-to-go IT asset data to eliminate data silos and operational overhead associated with chasing down information and toggling between tools.

## SUCCESS STORY

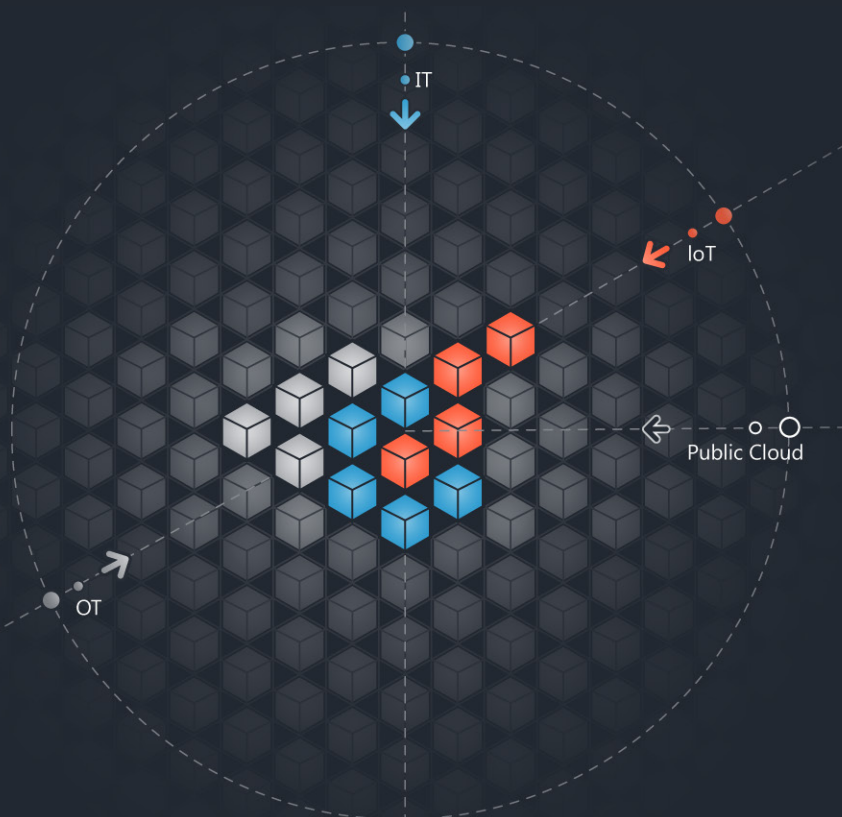

Cerner Corporation is an American supplier of health IT solutions, services, devices, and hardware. They needed better visibility into the IT assets of the 28 hospitals for which they provide outsourced IT services. Using Lansweeper, Cerner created a complete and accurate IT asset inventory for all 28 locations, reducing costs and protecting the hospitals' networks from vulnerabilities, malware and other IT security threats.

Discover the full story:

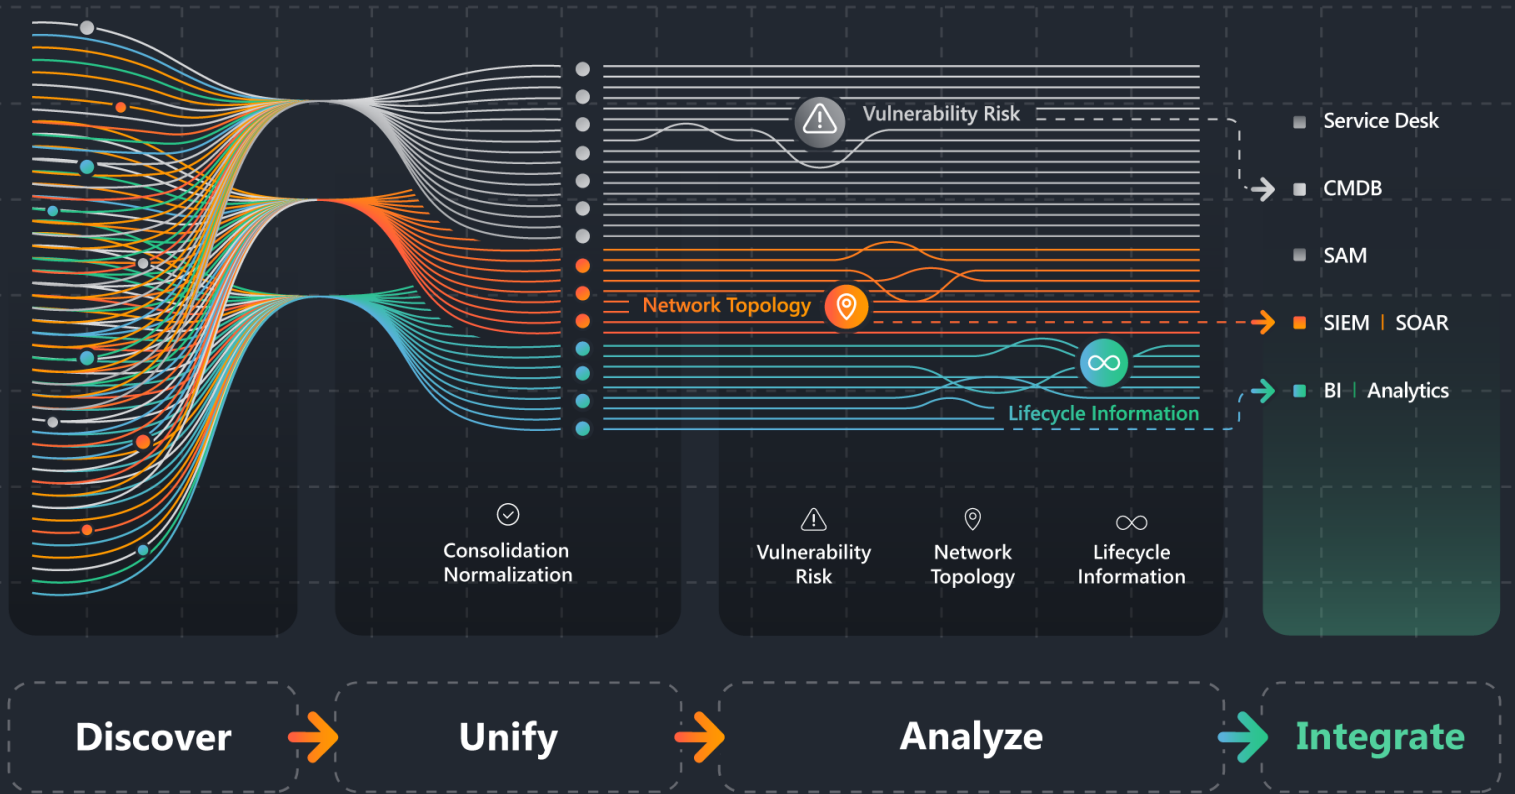

## Key Benefits

- ✓ **Increase visibility**  
by identifying previously undiscovered & unmanaged assets
- ✓ **Improve the accuracy**  
of the data using reconciliation, normalization
- ✓ **Incorporate relevancy**  
by revealing more information about each asset detected

# Lansweeper

## Complete Visibility and Risk Insights into Your Technology Environment

### Discover All Assets

Lansweeper offers top-notch network discovery, covering IT, OT, IoT, and public cloud, ensuring comprehensive coverage. Scannable assets range from Windows, Linux, Mac devices, to routers, printers, switches, ports, virtual computers, and mobile devices.

### Unify Your Inventory

Consolidate and normalize all asset data in one centralized inventory. Reduce complexity and costs by identifying and normalizing software applications, versions, licenses, and usage across your technology estate.

### Analyze Data

Visualize and analyze all the gathered data easily by using the IT dashboards and widgets, and network diagrams. Create dashboards for specific use cases like hardware, software, security, vulnerabilities and more.

### Integrate Seamlessly

Take action and support extensive use cases through integrations. Lansweeper connects right into your technology stack so you can unlock your IT asset data and fuel any IT scenario.
