Spectralink 7202 and 7212

Durable, Robust, and Feature-rich Handsets

The Spectralink 7202 and 7212 wireless DECT handsets are designed for long-term dependability and increased mobility in specialized working environments. The functionalities of the robust and feature-rich handsets make them a valuable working tool for personnel within industries such as retail and healthcare. Moreover, the flexible menu structure allows the handsets to be customized to specific vertical markets.

With these handsets, employees can benefit from being able to move around the office facility freely, while constantly being accessible as they roam within the work campus.

For the employee on-the-move, battery life is of utmost importance and since these handsets use temperature compensated charging, this allows for quick recharging without damaging the batteries and enabling employees to remain productive while mobile.

Spectralink 7202 Handset

The Spectralink 7202 is a robust, well-designed, feature-rich, and price competitive handset that meets the demands for mobility and is built for long-term dependability in harsh environments.

Spectralink 7212 Handset

The Spectralink 7212 extends the capabilities of the Spectralink 7202. With speakerphone and vibrate mode – as well as the possibility of attaching a wired headset, it allows users to enjoy hands-free mobility. Finally, the 7212 handset models are IP54 rated – supporting enhanced protection from dust and water splashes, for a more robust operation and handling.

BENEFITS

- Customize the handset with third-party applications

- Delivers exceptional voice quality without any background noise, echo, delay, or interruptions

- Resistant to drops and shocks making the handsets more durable

- Allows mobile employees to work more efficiently with extended battery life and quick recharging
