Ergonomic Working:

ZONE 1

PREVENT BACK TENSION

Check your posture.

A foot and back support will help provide the most comfortable working position.

How to use a foot rest

- 1. Set your seat height:** Ensure your seat height is set so your arms are parallel with your desk and your elbows are roughly at a 90° angle.
- 2. Check your seat pan:** Adjust your seat pan to ensure your legs are properly supported but there is enough space to avoid the chair interfering with the bending of the knee. Typically 3/4cms.
- 3. Support your feet:** Place your foot support in front of your chair and adjust the height until you can firmly place your feet flat on the top.
- 4. Movement:** Foot rests with rocking movement or foot textures encourage movement throughout the day helping to improve circulation and reduce fatigue
