
19" Office Rack Acoustic 10U / 12U with Active Ventilation and 3 PWM Fans, 600×800×660

SKU	20599-S-PWM
Produkt Verfügbarkeit	on stock
Belastbarkeit in kg	250
HE/U	12
Breite/width	600
Tiefe/depth	800
Höhe/height	660
kW	
Segmentation	

The Office Rack Acoustic 12U 600×800 is the ideal solution for noise-sensitive IT environments. Its robust construction, acoustic insulation and optimized airflow design ensure maximum noise reduction while maintaining efficient cooling performance.

Features & Specifications

- Sound-insulated 19" mini rack with internal acoustic foam
- Noise reduction up to 38 dB
- 3 temperature-controlled PWM fans (2 top exhaust, 1 bottom intake)
- LED display and thermostat-based automatic fan control
- Central control board supporting up to 4 fans
- Internal cable routing — no visible cables inside the rack
- Depth-adjustable 19" mounting rails, maximum installation depth: 550 mm
- Lockable glass front door and lockable, removable rear panel
- Cable entries at the top and bottom
- Grounding kit included
- Double castors with brake
- Powder-coated in RAL 9005 black
- Dimensions (W×D×H): 600×800×660 mm
- Weight including packaging: 70 kg

New Fan Generation

The integrated white PWM fans are specifically designed for use in acoustic server cabinets. They operate quietly and efficiently thanks to PWM speed control, automatically adjusting their RPM based on temperature. The LED display provides quick visual monitoring. The neutral-design central control board supports plug-and-play upgrades and is compatible with all acoustic rack variants from Lehmann IT.
