

PCIe HDMI Capture Card - 4K 60Hz PCI Express HDMI 2.0 Capture Card w/HDR10 - PCIe x4 Video Capture Device for Desktop - Video Recorder/Adapter/Live Streaming - Supports H.264

Product ID: PEXHDCAP4K

You can install the HDMI capture card into any low-profile or full-profile PCIe slot, including fixed workstations such as 2U or 4U rack-mounted servers or media centers.

With frame rates up to 60fps (frames per second) and H.264 encoding, this PCIe HDMI capture card is perfect for capturing ultra high-definition video for editing, compiling, and archiving. HDR10 is available through HDMI 2.0a support.

The software included with the 4K60 capture card encodes captured video in H.264 - the most widely adopted video compression standard in the world. This video recording card ensures your captures are compatible with most device platforms such as PC, Mac, iOS and Android.

The UHD capture card features an HDMI output port so you can watch the video source on a separate HDMI display while recording on your computer.
