Kingston Server Memory
Trust Kingston for all your Server memory needs.
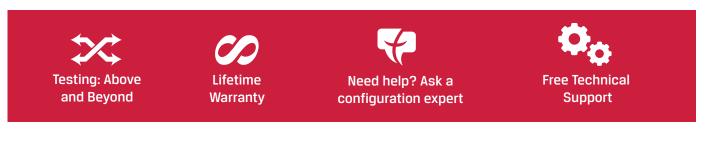

System-Specific server memory

Kingston System-Specific server memory is ideal for use in an OEM branded server and guaranteed to be 100% compatible. This memory is designed, manufactured and tested to the specifications of each brand name system, such as HP, Dell or Lenovo. Whether your goal is maximising capacity, performance or minimising power in your server environment, Kingston System-Specific server memory is the solution for you.

Server Premier memory SERVER PREMIER™

Kingston's Server Premier memory is designed to target the specific requirements of data centre & Cloud customers, System Integrators and SMB customers with white box servers. USPs include a Locked Bill of materials, advanced Product Change Notification (PCN), Intel & AMD validation.

Why Choose Kingston?

With more than 30 years of Server memory expertise, Kingston has the knowledge and resources to support your needs.
