

Dell Dual Monitor Arm - MDA17

Spec Sheet

Customized dual monitor alignment for comfort and productivity

Suspend and support two monitors with the Dell Dual Monitor Arm - MDA17. Featuring a sleek design that improves your workspace aesthetic, users can adjust the monitors for more comfortable viewing. Monitors can be easily moved in unison or pivot individually up to 90 degrees clockwise or anti-clockwise.

Single-handedly adjust monitors with ease

Articulation and tilt provides customizable positions and more comfortable viewing angles. The adjustable handle allows for easy one-handed movement of both monitors in unison. Double swivel functionality allows for 180 degree turning of both monitors so you can easily share content with your peers..

Integrated cable management for a tidier workspace

An internal latch on the arm ensures that cables will be hidden from sight, freeing up space on your desk.

Advanced, sleek design improves workspace aesthetic

The Dual Monitor Arm features a sleek design that improves the overall aesthetics of your workspace. The monitors fit easily onto a curved cross bar, which enhances your viewing experience when looking across your monitors.

Compatibility

Windows Dell E/P/U series monitors.

Supports Dell Quick Release Mount; two adapters provided for use with any VESA compliant monitors.
