DriveLock Device Control

DriveLock
securing your digital tomorrow

Perfect infrastructure protection for your business through targeted control of external devices and drives

Challenges

Do you use USB drives or external devices to exchange critical data in your company and need reliable protection.
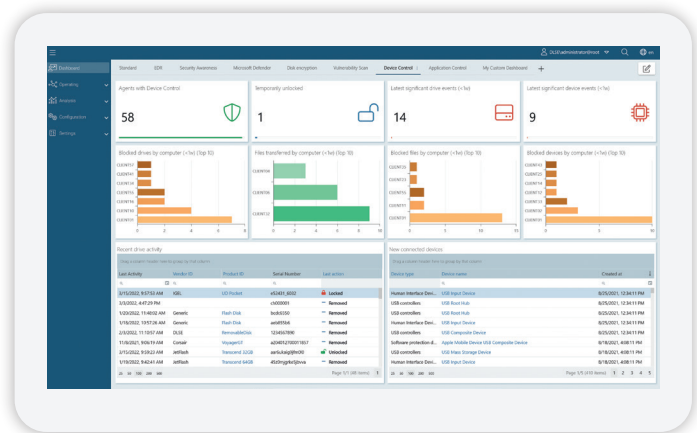

Are your employees sufficiently aware of the possible consequences of copying data from an external device to the computer or charging cell phones via the USB port.

You want to train them in the use of external data carriers and charging cables.

You want to prevent USB attacks.

You need support in meeting the security policies and or compliance standards for your critical infrastructure.

You need comprehensive forensic analysis and reporting.

Our Solution

Benefit from USB Port Security with Device Control from DriveLock

› Records exactly which file was copied to which medium, when and by whom.

› Encrypts USB media automatically and securely.

› Trains employees in the secure handling of data and external media.

› Provides extensive forensic analysis and granular reporting.

› Meets key security compliance standards for Government agencies and critical infrastructures.

Advantages with DriveLock Device Control

Device control allows you to protect all your data, devices and completely control the flow of data to and from your systems

Granular control and use of all devices	Only pre-approved devices and external drives are allowed	Prevents data transfer over unencrypted or unauthorized media	Comprehensive logging of all events
