# Keepit®

# Backup and Recovery for Microsoft 365. Your Strongest Weapon Against Data Loss

## Introduction

Without an off-site backup of your Microsoft 365 (M365) data, you are at risk from ransomware attacks and data loss. Microsoft themselves recommend using a third-party backup. Which is why thousands of companies have chosen Keepit to keep their M365 data safe.

**Your Dedicated Third-Party Backup for Microsoft 365**
With the market's most comprehensive M365 coverage, Keepit keeps your business rolling with instant access to all your data — always. Our blockchain-based encryption technology ensures your cloud data is immutable to malicious ransomware attacks or accidental deletion.

With four back-up copies stored in two separate vendor-neutral locations, you have data availability — always. Thanks to unrivalled ease-of-use, unlimited storage and archiving, and fast restore features that minimize downtime, Keepit is the simplest, most cost-effective way to protect your M365 data.

**Your Data Deserves The Best Coverage**
Keepit provides the most comprehensive and granular protection and archiving support for all key applications in Microsoft 365. It is the best coverage on the market.

# Get Your Microsoft 365 Data Back in Seconds

Specifically designed for admins, Keepit makes manual restore processes a thing of the past.  With ultra-fast smart search and restore features, you can restore multiple terabytes a day and get your M365 data back into its original location along with original file structure and metadata.

Our Restore Capabilities:

| In-Place Restore | PST Download | In-Place Archives | Cross-User Restore | Download | Shareable User Link | SharePoint Cross-Site Restore |
|---|---|---|---|---|---|---|

## Why Companies Globally Trust Us

Customers around the world have made Keepit their preferred choice to protect their data against data loss and downtime. Here's why they trust Keepit to keep their data safe:

### Business Continuity

Preserve access to essential data and continue business operations with clean copies of your data

### Instant Recovery

Find what you need quickly and restore individual records or entire application datasets in a few clicks

### Leading Security

Prevent attackers from manipulating your backups and minimize the risk of data breach with reliable security

### Cost Effectiveness

Never worry about overage costs or hidden surprises with simple and transparent pricing that saves you money

### Outstanding Simplicity

Minimize deployment efforts and significantly reduce admin time with a simple platform made to improve efficiencies

"We needed an easy and cost-efficient set-up that was secure, GDPR-compliant, and which provided 100% uptime. That's why we chose Keepit"

Nenad Ljubetic
Head of IT, TALKE Group (Germany)

Keepit is the world's only independent cloud dedicated to SaaS data protection.
You only need Keepit to cover all your key SaaS applications, including Microsoft 365, Salesforce, Azure Active Directory, Dynamics 365 and Google Workspace. Keepit is trusted by thousands of companies worldwide to protect and manage their cloud data. Leading analysts agree Keepit is the fastest and most secure enterprise-class SaaS back-up and recovery service.
