

# Making business more efficient

Introducing the new  
**colour laser print range**

# Technology that helps your business thrive

At Brother, we want to be a true technology partner for your business. And we understand that for a print infrastructure to be a success, it has to offer you flexibility, reliability and affordability, on top of good-quality printing. Most of all, it should have a positive impact on everybody's productivity and efficiency.

Designed to meet the needs of high-volume users, our new colour laser ranges let you print with confidence, offering you speedy print and scan times and lower costs thanks to super and ultra high-yield toners. Add to that enhanced security, intelligent mobile connectivity and expandable paper trays, and you have a printer that satisfies even the toughest demands in the office.

## A smarter way to work

This speedy new colour laser range improves efficiency and productivity. Enhanced document scanning and an Automatic Document Feeder that holds up to 80 sheets offer a quick and simple way to scan direct to the cloud or your network. With the touch of a button you can also customise the touchscreen with your own time-saving shortcuts, while longer-life cartridges mean more time working and less time changing toner. And as your business grows, printers in this range can grow with it, with optional additional paper trays that give you extra capacity.

## Protect what matters to your business

The advanced security capabilities of this colour laser range ensure you are always in full control of your print infrastructure. You can improve data protection by restricting machine access with network user authentication and secure function lock, which allows you to password-protect certain device functions. Plus, the NFC reader can be used to integrate with secure pull printing, enabling users to release their print job from any chosen device by swiping an ID card or entering a PIN.

# Delivering for even the most demanding businesses

If you need flexibility, reliability, and above all, affordability, the multifunctional colour laser ranges are ideal. Delivering fast print and scan speeds and resilient security for a low total cost of ownership, these machines help your business take efficiency to the next level.

# Fast and affordable business colour

Our new colour lasers offer fast colour and mono printing at a low cost per page, and an affordable total cost of ownership. The range includes invaluable extras like WiFi and NFC connectivity to make mobile working easier, without compromising on security.

## Putting you back in control of your print

A true print technology solution goes beyond hardware. Maximise your print efficiency and minimise costs by choosing a Brother PrintSmart solution that's tailored to your business.

## Monitor costs with PrintSmart CostControl

We know control is integral when it comes to print costs. We make it easy with PrintSmart CostControl. It gives you full visibility of who is printing what, and allows you to improve budgeting by setting print quotas and taking advantage of better reporting on usage.

## Enjoy total print security with PrintSmart SecurePro

With PrintSmart SecurePro, you can easily manage documents and devices. It allows you to collect print data from connected devices to better understand how resource is being used in the office. You'll also be able to scan documents direct to an email address instead of using shared folders – helping to ensure sensitive documents remain private.

# Make your print as individual as you are

For businesses like yours, a one-size-fits-all print solution simply doesn't work. Our Managed Print Services offer you a simpler way to manage your print – in a shape and size that perfectly suits you. It offers improved control, security and efficiency, and an altogether better print infrastructure.

### No need to order toner

Our MPS solution ensures you'll never run low on print supplies. We'll take care of the ordering, delivery and even recycling of your old toners, meaning you can spend your time on running your business.

### No waiting for repairs

Our At Your Side support means you don't have to deal with long periods of downtime. We'll respond quickly to any faults and provide professional support, so any impact on your business is kept to a minimum.

### No worrying about spending

We know that visibility is key when it comes to budgeting for print. With our intuitive online portal, you can find a full breakdown of all your costs, as well as reporting on the way you spend. So you can stay on top of your usage at all times.
