Mobile: most compact 'ergonomic' mouse

Connection: USB

Cable length: 1,50 m

Specifications

Dimensions:	81 x 45 x 56 mm (W x D x H)
Weight:	100 g
Product code:	BNEDXT

Research

Using a mouse to navigate the cursor and activate icons is a precision task that demands a high degree of accuracy. Moving control of the mouse is most efficient in what is known as the precision grip (Napier, 1956) where index finger and thumb work closely together, and not by moving the whole arm from the shoulder (as in many so called ergonomic mouse designs).

1. Neutral posture
2. Right-handed
3. Left-handed

Health & Safety Regulations

Council Directive 90/270/E The minimum safety and health requirements for work with display screen equipment The use as such of the equipment must not be a source of risk for workers.
