

Timer Switch

00223306 "Mini" Digital Week Timer Switch, Accurate to the Minute, 20 Programmes, white

Highlightstext:

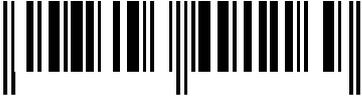

- Digital timer that allows automatic switching on/off of electrical devices at pre-set times
- Timer for automatic On/Off switch at times you can specify – helps you save on electricity
- Different switching programmes can be set flexibly and precise to the minute
- In Random mode, the timer switches the connected devices, such as the ceiling light or TV, on and off at random intervals, helping to deter burglars
- With increased touch protection to avoid accidental contact
- Ideal if you want to control lamps, radiators, pumps or Christmas lights individually, for example
- Data storage in the event of a power failure
- Up to 20 switching programmes with week day, hour and minute setting
- 15 different week day combinations possible, e.g. Programme 1: Mon - Fri / Programme 2: Sat + Sun
- Manual On/Off function
- Without any settings, the timer is automatically in permanently on mode
- Countdown function: ideal as a kitchen timer or for heat lamps for plants and animals that should only light up for a certain period
- Can be toggled for summer / winter time
- Compact housing

Technical characteristics:

- Colour: White
- Product Division: HiFi, TV & Home Cinema
- Shade of colour: White
- Maximum Connected Load: 1800 W
- Voltage: 250 V
- Additional Functions: With increased Contact Protection
