

Check Point CloudGuard IaaS Elastic Licensing

For Private Cloud and Public IaaS (AWS, Azure, GCP)

This document introduces the licensing model of Check Point CloudGuard IaaS Software Solution for Private Cloud and Public IaaS (AWS, Azure, Google Cloud Platform [GCP]). The Check Point CloudGuard IaaS licensing offers our customers easy sizing calculation, simple deployment process and native scaling-capabilities for future growth.

Note – the CloudGuard for NSX/ACI licensing models are not covered in this document.

CloudGuard IaaS - Licensing Alternatives

There are two options for licensing the CloudGuard IaaS product:

- **Bring Your Own License (BYOL)** - This elastic CloudGuard IaaS licensing model is based on the number of vCores used across all CloudGuard IaaS Gateways in the cloud environment. The BYOL license can be purchased through the regular Check Point channels. The BYOL licensing model is applicable for both Private Cloud (*CloudGuard for VMware ESXi, Microsoft Hyper-V and KVM*) and Public IaaS (*CloudGuard for AWS, CloudGuard for Azure & Azure Stack, CloudGuard for GCP*).
- **Pay As You Go License (PAYG)** – This integrated Check Point CloudGuard IaaS license is based on usage (hourly) and is only available for Public IaaS (AWS, Azure and GCP). The PAYG license is billed by Amazon/Azure/GCP Marketplace directly. Fees include the Check Point Software Blades, and Standard Support, but do not include the cost of the virtual compute (Virtual compute is paid to AWS/Azure/GCP directly).

CloudGuard IaaS Bring Your Own License (BYOL)

The CloudGuard IaaS elastic BYOL licensing model is a strong differentiator for Check Point CloudGuard IaaS. No other security vendor has a flexible licensing model like this one. This is an ideal solution for Enterprises and MSPs that want to use many CloudGuard IaaS Gateways on-premise and/or in the cloud. This Elastic Licensing for CloudGuard IaaS Gateway is applicable for five CloudGuard IaaS products:

CloudGuard for VMware ESXi, Hyper-V, KVM, CloudGuard for AWS, CloudGuard for Azure & Azure Stack, CloudGuard for GCP.

Elastic licensing model key benefits:

- Simplify your CloudGuard IaaS Gateway (GW) provisioning by using a single global license for as many CloudGuard IaaS GW as you need. There is no need to issue and /or assign a new license per CloudGuard IaaS GW. All CloudGuard IaaS GW automatically fetch the license from a central license pool deployed on the Check Point management.
- Easily scale up your CloudGuard IaaS GW by allocating more vCores (more compute power) as needed. There is no need to replace the current license with a new one when your CloudGuard IaaS GW needs more performance capacity.
- Ability to move vCores from one CloudGuard IaaS GW to another using the same global license. Using a central floating licensing mechanism, customer can decommission vCores from one CloudGuard IaaS GW and assign them to another CloudGuard IaaS GW. Customer can also buy additional licenses for more CloudGuard IaaS vCores and add them to the central pool.
- MSPs can buy one pool of CloudGuard IaaS license for many vCores and use it for different tenants as they like.

The BYOL CloudGuard IaaS Packages

There are two BYOL CloudGuard IaaS license packages, NGTX and NGTP

	Next Generation Threat Prevention & SandBlast™ (NGTX)	Next Generation Firewall (NGTP)
Firewall, VPN, Advanced Networking and Clustering, Identity Awareness, Mobile Access, IPS, Application Control, URL Filtering, Anti-Virus, Anti-Bot, Anti-Spam and Email Security, Network Policy Management, Logging and Status	V	V
Threat Emulation, Threat Extraction	V	–

The BYOL Check Point CloudGuard IaaS SKUs (Bundles)

	CloudGuard for VMware ESXi, Microsoft Hyper-V and KVM	CloudGuard for AWS	CloudGuard for Azure & Azure Stack	CloudGuard for GCP
NGTX & SandBlast	CPSG-VSEC-VEN-BUN-NGTX-1Y	CPSG-VSEC-AWS-BUN-NGTX-1Y	CPSG-VSEC-AZURE-BUN-NGTX-1Y	CPSG-VSEC-GCP-BUN-NGTX-1Y
	CPSG-VSEC-VEN-BUN-NGTX-2Y	CPSG-VSEC-AWS-BUN-NGTX-2Y	CPSG-VSEC-AZURE-BUN-NGTX-2Y	CPSG-VSEC-GCP-BUN-NGTX-2Y
	CPSG-VSEC-VEN-BUN-NGTX-3Y	CPSG-VSEC-AWS-BUN-NGTX-3Y	CPSG-VSEC-AZURE-BUN-NGTX-3Y	CPSG-VSEC-GCP-BUN-NGTX-3Y
NGTP	CPSG-VSEC-VEN-BUN-NGTP-1Y	CPSG-VSEC-AWS-BUN-NGTP-1Y	CPSG-VSEC-AZURE-BUN-NGTP-1Y	CPSG-VSEC-GCP-BUN-NGTP-1Y
	CPSG-VSEC-VEN-BUN-NGTP-2Y	CPSG-VSEC-AWS-BUN-NGTP-2Y	CPSG-VSEC-AZURE-BUN-NGTP-2Y	CPSG-VSEC-GCP-BUN-NGTP-2Y
	CPSG-VSEC-VEN-BUN-NGTP-3Y	CPSG-VSEC-AWS-BUN-NGTP-3Y	CPSG-VSEC-AZURE-BUN-NGTP-3Y	CPSG-VSEC-GCP-BUN-NGTP-3Y

-Bundle SKUs – are subscription based includes: 1 vCore, NTGP/NGTX and Standard support for 1/2/3 Years

CloudGuard IaaS Pay as you Go (PAYG) – Valid only for Public IaaS

To learn about CloudGuard IaaS PAYG licensing, please visit the following marketplaces:

- CloudGuard IaaS PAYG in AWS - <https://aws.amazon.com/marketplace/seller-profile?id=a979fc8a-dd48-42c8-84cc-63d5d50e3a2f>
- CloudGuard IaaS PAYG in Azure - <https://azuremarketplace.microsoft.com/en-us/marketplace/apps/checkpoint.vsec?tab=Overview>
- CloudGuard IaaS PAYG in GCP - <https://console.cloud.google.com/launcher/details/checkpoint-public/check-point-vsec---payg>
