Lenovo ThinkTab X11

Rugged design with MIL-STD-810H & IP68

Removable battery & batteryless mode

Front-mounted NFC

Dual USB-C ports

5G + Wi-Fi 6E connectivity

Powered by

Built for business, not just durability.

An industry-driven solution designed to meet diverse sector needs, Lenovo ThinkTab X11 is the first Android-powered rugged tablet under the Think brand, bringing a trusted legacy of reliability, professional service and proven quality. Ideal for demanding commercial environments with MIL-STD-810H certification, IP68 ruggedness and Batteryless Mode, this mobile computing solution excels in extreme conditions. But the intentional unified design language delivers an aesthetic order that elevates both function and form—complete with an iconic Think red customization key to give nod to the Think heritage. On-the-move professionals in logistics, manufacturing, construction and transportation will appreciate the dual USB-C ports for flexible device extension, 5G and Wi-Fi 6E for reliable connectivity, and long battery life to boost everywhere productivity.

You'll love the natural one-handed tablet operation while sensitive information stays protected. The front-mounted NFC allows for instant tap-to-connect, enabling quick scanning for login and secure transactions without lifting the device, perfect for inventory checks, access control or card payments. Plus, touchscreen interaction is worry-free, thanks to the crystal-clear outdoor 10.95" 2.5K display with Gorilla Glass and 600nits brightness, along with the glove-and-wet touch support for usability no matter the environment. From extended support plans to seamless integration into enterprise IT environments, the Lenovo ThinkTab X11 is built to be a dependable partner in demanding industries.

Secure durability

Unphased by any harsh environment, the Lenovo ThinkTab X11 delivers the ultimate in ruggedness, including resistance against shock, water and extreme temperatures. This hardy tablet even withstands drops onto wood from 1.5m and onto steel plates from 1.22m. With MIL-STD-810H certification and IP68 rating, this premium business tablet with ruggedized case reduces downtime and lowers repair costs. The physical durability is matched by its security and compliance features such as the front NFC and secure login/signoff. Convenient biometric certification with fingerprint and facial unlock further enhances data security.

Go-everywhere productivity

Fueled by the Snapdragon® 7s Gen 3 processor, the Lenovo ThinkTab X11 boosts operational efficiency and accuracy in every industry that demands productivity in vehicles, outdoors and in demanding environments. With full sunlight readability thanks to the 600nits bright display, as well as glove-touch responsiveness and the optional IP68 Lenovo Tab Pen XE, work is never hindered by blazing sun, bitter cold or pouring rain. On-the-move pros in remote sites, warehouses and anywhere in the field also require always-connected precision for access to real-time data and accurate GPS. With 5G, Wi-Fi 6E and Bluetooth 5.4, along with L1+L5 dual-band GNSS, the ThinkTab X11 enables robust operational visibility for informed decision making plus next-level data sync and asset tracking.

All-day get-it-done

Another vital feature for the mobile industrial workforce is all-day power and rich expansion capabilities—and Lenovo ThinkTab X11 delivers. The 10,200mAh removable battery for hot-swappable capacity¹ means you don't have to hit pause during extended shifts. And the batteryless mode eliminates battery safety risks in extreme conditions and optimizes power management to extend battery life. For instance, in logistics vehicles or 24/7 retail environments, this innovative technology switches to direct adaptor power, effectively preventing heat damage and battery aging from continuous charging. Dual USB-C ports enhance operational efficiency in demanding commercial environments, enabling simultaneous connection to essential peripherals—such as barcode scanners, payment devices, etc.—without interrupting power delivery. This streamlined setup reduces downtime, supports continuous workflow and eliminates the need for extra adaptors.

¹Need connection to inbox or recommended power adaptor (36W+PD).

Security

Mitigate security risks with built-in protection, zero-trust models and recovery planning.

Lenovo ThinkShield Solutions for ThinkTab¹

- ThinkShield XDR (SentinelOne)
- Secure Access (Absolute)
- Lenovo Device Orchestration
- TruScale DaaS Security Services
- ThinkShield Hardware Disable²

Hardware protection

- IP68 rating³
- MIL-STD-810H certification⁴

Google Android Enterprise Recommended (AER) Certification

Ensures devices are patchable, manageable and encrypted in compliance with Google's strict Android security standards

Google Play Protection

Scans apps to detect malware and block harmful behavior, leveraging Google's global threat intelligence

Secure Hub

Hub to manage network security, control app permissions and protect sensitive data

Threat Defense by Zimperium[®]

Persistent, on-device protection with advanced ML to detect threats across the kill chain

Enterprise-grade features

Front-side NFC for secure transactions

Biometric options

Fingerprint sensor to complement other authentication methods.

Long-term support

Default 4 years SW support (extendable on demand)

Sustainability

Help meet regulatory and internal ESG goals with greener IT practices.

TruScale DaaS for Sustainability¹

Modular solution to help manage IT carbon footprint, reduce IT costs and boosts ROI.

Optional

Asset Recovery Services (ARS)

Lenovo helps mitigate end-of-life IT and data security risks by reusing parts, refurbishing devices and recycling assets. Buy-backs help you fund future IT investments, and Lenovo hardware can get a new lease on life through Lenovo Recertified Services.

CO₂ Offset Services

Manage your technology carbon footprint, make tangible contributions to the environment, and support verified climate action projects with easy-to-purchase offsets. These services estimate the carbon emissions across the device lifecycle through a seamless, transparent process.

Carbon Impact Portal

This digital dashboard provides real-time, device-level data on emissions, energy use and packaging to help track and report environmental impact for ESG goals, simplifying the shift to more sustainable, circular IT by centralizing metrics and linking to offset services.

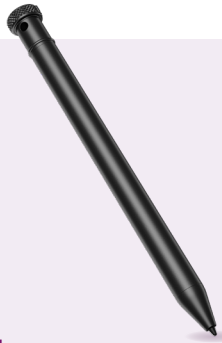

¹Optional.

²Efficient and cost-effective permanent deactivation of security-sensitive components to prevent unauthorized access without requiring any hardware or software redesign.

³IP6X for 2kg of talc powder/m³ for 2 hours; IPX8 for up to 1.5m water immersion for 30 minutes.

⁴Military standard certification is valid only when the device is used with the specifically supplied protective case.

Accessories

Tab Pen XE

With an enhanced user experience and shorter pen length to improve grip and portability, the new Lenovo Pen XE is the perfect companion to the Lenovo ThinkTab X11. The IP68 rating keeps this stylus resistant to dust and water to enable use in the outdoors. Plus, a new runway-shaped convexity on the pen cap improves secure insert into the Rugged Smart Case, while the added cap hole allows for a hanging strap to boost loss prevention.

Rugged Smart Case

A modern curved shape with narrowing features maximizes the portability of this rugged case, while TPU material and resistance to a 1.5-meter drop ensures your Lenovo ThinkTab X11 meets MIL-STD-810H criteria. Added holes for hanging straps on the back cover makes it easy for users to carry it around. The exposed power button enables fingerprint identification, and the Lenovo Tab Pen XE stores neatly and securely in the lower corner of this protective cover.

Lenovo Vantage Pro

Lenovo ThinkTab X11 provides the power, performance and security to accelerate every business. The sleek, durable design, along with robust privacy, safety and connectivity, deliver an enhanced on-demand approach to on-the-move professionals in manufacturing, logistics, construction, energy and logistics/warehousing. Customizable to suit every business, all Lenovo tablets are supported by a suite of software solutions to configure, manage, deploy and maintain devices right out of the box.

Enabling easy setup and management to boost productivity, Lenovo Vantage Pro empowers businesses to work more efficiently and stay focused on what matters most.

Lenovo ThinkTab X11 is designed and positioned as a data-only tablet and does not support traditional voice calling functionality. Messaging services such as Short Message Service (SMS) and Multimedia Message Service (MMS) depend on the capabilities of the mobile network and carrier-supported services, such as IP Multimedia Subsystem (IMS). As a result, availability, performance and reliability of such services may vary by carrier and network environment, and intermittent delays or failures in sending or receiving messages may occur. These characteristics are inherent to the product's design and intended use, and should be considered when selecting and using the device.
