VESA MOUNT

### Vesa Connection

Any monitor equipped with a VESA mounting grid (100x100 or 75x75) can easily be attached to the monitor arm. The VESA mounting system is a widely used solution that most monitors are equipped with. Four screws hold the monitor securely to the mount, by its centre of gravity.

### Swivel & Tilt

Some monitor stands come with a limited tilt and swivel range. Using a monitor arm increases your monitor's range of motion dramatically: You can tilt the monitor in a wide range so it points upwards or downwards for the optimal viewing angle. The integrated swivel enables you to turn the display horizontally.

### C-lamp or Grommet Mount

Choose between Grommet or C-lamp mount to sit the monitor arm firmly on your desk.

### Cable Management

Using the detachable covers on the monitor arm, simply push through your cables inside the pre-allocated routes in the monitor arm. After fitting both power and display cables inside, close the covers and experience a tidy desk with neatly organised connections. Cables are kept in place even when moving the display or turning it into portrait mode.

### Mechanical Gas Spring System

Smooth motion in extension, retraction, or changing orientation. The precise mechanical gas-spring allows easy adjustment with just a firm hand move, and the monitor stays sturdily in its adjusted position. Easily adjust it anytime to get the most ergonomic position. Spring tension is adjustable for lighter/heavier monitors for easy movement and firmness.
