PRODUCT DESCRIPTION

The IT-mount is a game-changing universal plate that enables you to mount any device - a Laptop, Tablet, and iPad - of any size onto any surface. It is designed to securely deploy devices in multiple configurations - on a floor/podium stand, counter stand, or on a wall arm. It is a revolutionary laptop stand that elevates any work environment across industries.

With a 100 x 100 VESA pattern and powerful VHB sticker pads, it allows you to secure any device, without fear of it falling or being stolen.

The IT-mount can be repurposed and used again on other displays, using a new set of stickers pads, creating an eco-system across our wide range of VESA compatible arms, mounts, stands, and mobile solutions.

The functionality of the laptop stand makes it a highly valuable tool, because of the added keyboard, in many working environments and front-facing customer services including hotels, restaurants, schools and colleges, tradeshow, and hospitals.
