

# PRIMEBOOK CIRCULAR

## PRODUCT DATA

MODULAR, EFFICIENT,  
ROBUST, SUSTAINABLE

## The sustainable high-end business notebook

The PrimeBook Circular is based on the principle of „Circular Modularity“. This means that it has been designed that modular computer components can be exchanged, upgraded or replaced. This extends the product lifecycle of the hardware and reduces CO2 emissions demonstrably.

Like all Prime Computer products, the PrimeBook Circular is a Green IT product. It is available with various processors from Celeron 6305 to Core i7-1165G7 and is compatible with future versions of the modular computer elements.

The high-quality manufactured notebook has an anodized aluminum case and a glass trackpad with Microsoft Precision Drivers. A fingerprint reader and an HD IR camera with Windows Hello support are also part of the equipment. Despite an extremely powerful 77 Wh battery,

the PrimeBook Circular weighs just 1.5 kg. A modern 3,000 x 2,000 px touchscreen display with narrow edges and a maximum brightness of 400 nits offers just the right solution for many projects.
