Outstanding picture quality & detailed reproduction for business

BRAVIA™

Harness the power of rich media content for your organisation with BRAVIA Professional Displays.

androidtv

Cognitive Processor XR™

World's first processor with Cognitive Intelligence

Our BRAVIA XR Display takes vision and sound to the next level with the ingenious Cognitive Processor XR. It understands how humans see and hear, providing a whole new experience that immerses you completely in the scene.

4K HDR Processor X1™

One chip, incredibly real

X1
4K HDR Processor

With Object-based HDR remaster and 4K HDR technology, our new 4K HDR Processor X1 reproduces more depth, textures and natural colours than Sony's entry level 4K Processor X1. You'll see pure colours at higher brightness levels for exceptionally realistic pictures.

Cognitive Processor XR™

XR Color

A wide palette of naturally beautiful colours

See colours that are natural and beautiful to the human eye. The Cognitive Processor XR enables our unique display to access a wider palette and reproduce each colour with the subtle differences seen in the real world. With extended hue and saturation, vivid shades and realistic texture can be seen.

XR Clarity

Recreating lost texture, the intelligent way

Whatever the content or source, you'll clearly see them close to 4K resolution with XR 4K Upscaling. Our Cognitive Processor XR accesses a vast amount of data, intelligently recreating lost textures and detail for real world pictures.

XR Picture

XR Motion

Intelligent motion processing for fast-moving blur-free scenes

Watching fast-moving movies just got a whole lot better. Our Cognitive Processor XR with XR Motion Clarity™ cross analyses data to ensure action stays smooth, bright and clear with no blur.

XR Contrast

Real life depth with deep blacks and intense brightness

Feel breathtaking contrast, just as in real life. Our Cognitive Processor XR cross analyses data, enhancing pictures in the same way that the human eye focuses for real life colour and depth. With XR Contrast Booster, bright areas are brighter and dark areas darker - eliminating details overwhelmed by shadow or lost in blown-out highlights.

4K HDR Processor X1™

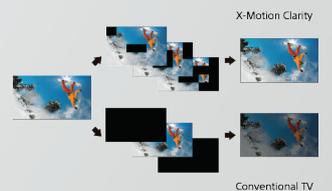

Picture

Unique 4K X-Reality PRO picture processing technology upscales every pixel for remarkable clarity. Advanced noise reduction techniques and a special pattern database ensure every scene is full of lifelike detail.

Contrast

Imagine seeing a white object in a dark environment on your display: on an edge-lit or direct-lit display, you would sacrifice the brightness of the object for a darker background (or vice versa), and the background would likely appear blue or grey. On a Sony Full Array LED display with local dimming, you get a beautiful, natural picture with crisp brightness and an authentically dark background.

Colour

By widening the colour spectrum, TRILUMINOS powered by our X1 processors reproduces more colours than a conventional display. It analyses and processes data in every image to make colours even more natural and precise so pictures are closer than ever to real life.

Clarity

On some screens, sports and fast-action scenes can seem to go by in a blur. Our latest X-Motion Clarity™ technology keeps everything smooth, bright, and clear. Each "blink" is individually controlled and its duration optimised, while brightness is boosted when needed, so you won't miss a thing.

Expanding the possibility of your business with the new lineup of BRAVIA Professional Displays

Newly added 100" & 32" size broaden the lineup to match to any installation locations.
The new Standard product line brings a wide options for business application environment.

Sony's largest professional display model
with supreme picture quality features

100" NEW

The new 100" BZ40J delivers supreme picture quality, high contrast, and more detail for large-sized digital signage and meeting rooms.

XR
Cognitive Processor

Features for Professional Use

**Professional
Mode**

New professional features let you disable input or remote control, remove labels and block buttons; customize and story display settings and features, add security then copy them easily from display to display via USB flash memory.

**Flexible Content
Layout with HTML5**

The BZ Series offers build-in support for the HTML5 application platform, so it's possible to use HTML5 interactive signage content without requiring a set-top box or PC. The content screen can be freely laid out using the 4K video, pictures, or even with the HDMI input.

Small, high picture quality 32" 4K display model

NEW **32"**

Small in size, but big in picture quality for meeting contents details even in huddle space environment with new 32" BZ30J.

Professional Design

Suitable designs for professional use such as Digital Signage.

Logo Position for Public installation

Sony logo is printed to top-right side bezel for public installation such as digital signage and it eliminates the sideways logo in portrait orientation.

Four-sized Uniform Bezel for Portrait Installation

* for BZ40J only

Carrying Handle

*for BZ40J only

Cable Management

Neatly bundles the power cable, HDMI and other cables with a cable clasper.

32" AC Adapter Holder

Smart installation by adapter holder even in limited space
* for BZ30J only

IP Network and Serial Communication Controls

The BZ Series is controllable both via IP network (wired/wireless LAN) and RS-232C. This makes it possible to incorporate the displays into a variety of existing systems, such as in offices and as eye catching signage.

Wi-Fi 5Ghz/Apple AirPlay & Chromecast built-in™

Discover a new world of possibilities with the new BRAVIA functionality. Easily mirror content onto your BRAVIA Pro Display using Apple AirPlay or Chromecast built-in, and take advantage of Wi-Fi 5Gz connection.

Our largest size screen model with Cognitive Processor XR & Supreme Picture Quality

Peak Brightness : 940cd/m²

Cognitive Processor XR™

The BZ40J incorporates the Cognitive Processor XR that uses human perspective analysis to cross analyse thousands of elements at one to create an intensely immersive picture.

BRAVIA XR

XR Triluminos Pro

Powered by our Cognitive Processor XR, this display reproduces colour in a way that humans find beautiful. See a wider palette of colours with an enhanced range of hue and saturation, allowing natural shades and precise details to be seen, even in the dark scenes.

XR 4K Upscaling

Powered by our Cognitive Processor XR, this display takes 2K signals close to true 4K quality for incredibly real and immersive viewing. XR 4K Upscaling accesses and utilises a vast amount of data analysing patterns in scenes and recreating subtle details.

XR Motion Clarity™

On some screens, fast-moving scenes can seem to go by in a blur. Our latest LED XR X-Motion Clarity technology keeps everything smooth, bright and clear. Each frame is individually controlled and its duration optimized, while brightness is boosted when needed, so you won't miss a thing.

XR Contrast Booster

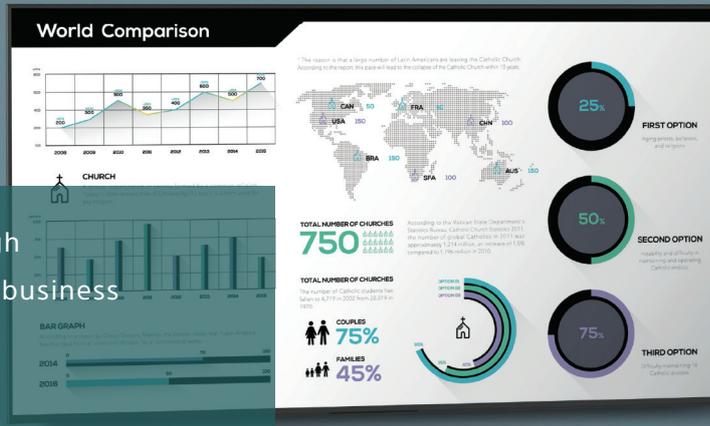

By precisely balancing light output across the screen, dimming some areas and boosting others, the XR Contrast Booster adjusts brightness for higher peaks in glare and deeper blacks in shadows. As bright areas are brighter and dark areas darker, scenes look more real with extra depth and detail.

24/7 Portrait Tilt

High brightness, high contrast images for business application content

Peak Brightness : 850cd/m²

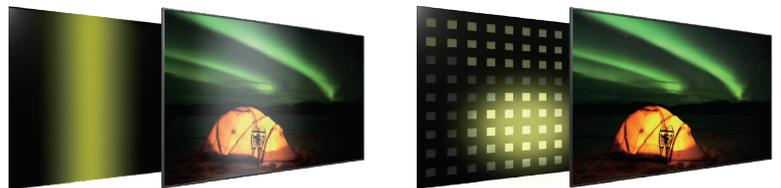

Picture Quality Features

Full Array LED

Brighter highlights and deeper blacks

Multiple LED zoning allows Full Array display models to adjust and create contrast depending on the scene, resulting in more light where brightness is needed, and less light where darkness is needed.

Cosmetic Design

Logo position

All Side Terminal Position

Flat bottom bezel

24/7 Portrait Tilt

High picture quality model with flexible installation for mid-sized spaces

Peak Brightness : 570 cd/m²*

*43" : 560cd/m² (at bottom)

Picture Quality Features

Motionflow XR

Less blur, even in fast scenes

On some screens, sports and fast action scenes go by in a blur. Our Motionflow technology keeps movement smooth and clear by creating extra images between images and black images between scenes. The result? Less blur and afterimage, more flowing motion.

Options & Accessories

BRAVIA Meeting Free

With BRAVIA Meeting Free turn a regular display into a dedicated meeting room display. Easily show Home Screen Content that meets the needs of each company, such as how to use meeting room equipment, the company logo, and messages for visitors on the home screen of the meeting room display.

BRAVIA Signage Free (WQF-BS1F)

BRAVIA Signage Free is an easy-to-use standalone signage player application, allowing you to display video, photos and HTML5 content directly from a connected USB flash memory. It's quick and intuitive to set up screens, edit and preview playlists and schedules using the BRAVIA display's remote controller.

TEOS Workplace Solutions

Control and manage BRAVIA Professional Displays remotely with TEOS by Sony. Create and schedule signage content, monitor and update displays, enable wireless mirroring from laptops to BRAVIA Professional Displays in meetings, and much more.

Visit pro.sony/teos for more information.

Different accessories

Touch overlays, front covers, kiosks and totems to suit your needs.
