Stylish and durable, this Targus® Portable Laptop Stand with Integrated Dock is constructed with Aluminium and designed to be foldable to an ultra-compact size (only 25.3 x 6 x 1.83 cm), so it can be easily stowed within a Targus® backpack or laptop case. Perfect for any modern hybrid worker looking to transform their laptop into a workstation at any location.

The Targus® Portable Laptop Stand with Integrated Dock ensures maximum productivity and keep workspaces organised wherever it may be. Simply 'dock' the laptop using the integrated USB-C cable and extend the laptop to an extra monitor at up to 4K 30p via the HDMI, plus connect to all essential accessories or smart devices via 2x USB-A and 1x USB-C ports, all supporting up to 5 Gbps superfast data transfer rate.

To expand the integrated dock capabilities even further, the portable Targus® USB-C PD Chargers (APA series available from 65 W to 100 W) are the perfect travel companions, providing up to 100 W power when connected to the USB-C PD port on the base of the stand. Power Delivery 3.0 technology then takes care of the rest and shares the power between connected accessories as well as charges the host laptop as required. Plus, when 'hot-desking' or working in a semi-permanent location, the integrated dock offers an extra option to securely connect to the office LAN using the RJ45 Gigabit Ethernet port.

High quality Aluminium construction not only ensures a robust platform for the host laptop weighing up to 40 Kg, it also has heat reduction properties that helps to alleviate overheating. Plus, 5 adjustable stand positions ensure the screen stays at the correct height for optimum working posture, reducing the potential of back and neck strains.
