

Kasten by Veeam: #1 Kubernetes Backup

Purpose-built for Kubernetes, Kasten K10 provides enterprise operations teams an easy-to-use, scalable and secure system for backup/restore, disaster recovery and mobility of Kubernetes applications. See customer case studies, demo videos and more [here](#).

Kasten K10 licensing

One Kasten K10 license per node.
Kubernetes Backup and DR with Kasten by Veeam® is available in one, three and five-year annual subscriptions. The longer the annual subscription, the larger the discount.

Kasten K10 use cases:

- Kubernetes Backup/Restore**
- Kubernetes Disaster Recovery**
- Kubernetes Application Mobility**

Why Kasten K10?

Complete application protection

Automatically capture and protect an entire application stack, including resource definitions, configuration and underlying data.

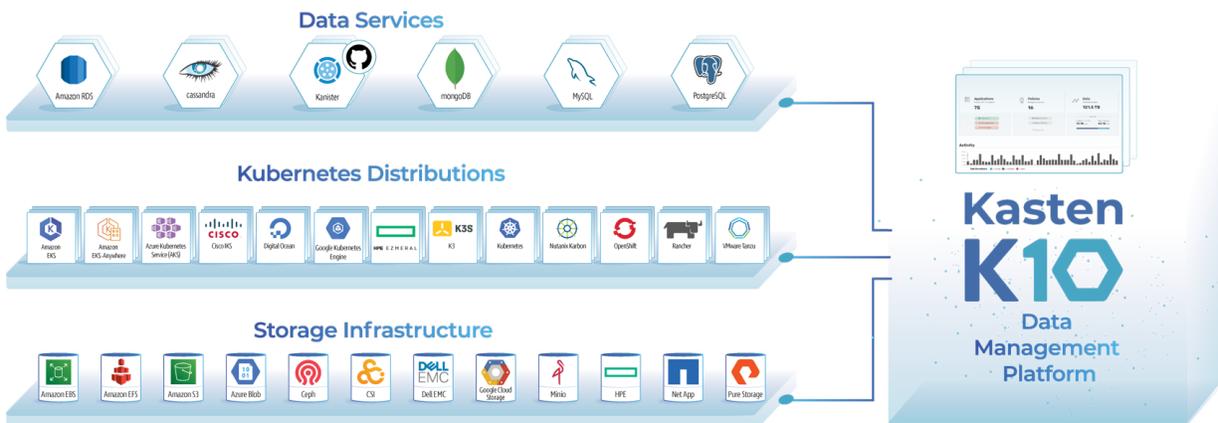

Policy-based backup automation and monitoring

Manage backups at scale through dynamic policies that apply to auto-discovered applications. Monitor data management compliance and easily take corrective action.

Ransomware protection

With immutability support for wide-ranging object storage implementations, coupled with policy-based automation, Kasten provides a last line of defense to recover from ransomware attacks.

Kasten K10 provides the freedom of choice
