

Wacom Cintiq Pro Family

Engineered for harmony

Breakthrough performance for inspired creativity. Thanks to a feat of design, engineering, technology and advice from leading professionals, creating with Wacom Cintiq Pro is an effortless, harmonious experience.

Morphs to the way you create

With customizable weight, grip thickness, pen buttons and center of balance, configure Wacom Pro Pen 3 to suit your style.

A creative touch

The 10-point multi-touch enables you to interact with your content simultaneously with the pen on screen. Use natural gestures like panning, zooming, rotating and enjoy a completely immersive experience in your creative process. Seamlessly switch between touch gestures and pen strokes in a single move.

Find the right angle

The Wacom Cintiq Pro Stand is designed specifically to bring maximum comfort, flexibility and stability to any desktop studio or remote workspace. Wacom Cintiq Pro 27 & 22 require either a stand* or a compatible VESA 100 x 100 mm monitor arm**.

Create at the speed of imagination

Never break your flow with the freedom of ExpressKeys. Repositioned in the new rear grip of the display, each key is a shortcut of your choosing. This intuitive design gives you access to your favorite shortcuts before you realize you need them.

Space for yourself

Add the Wacom Cintiq Pro Extension Table*** to hold your keyboard, phone or sketchbook, and use the embedded 1/4-inch UNC threads to mount cameras, microphones and LED lights.

Effortlessly connected

Ensure every pen stroke is a work of art in motion without jitter, lag, or ghosting thanks to the enhanced pen sampling rate that works in harmony with the display. Every pen movement, from heavy color strokes to featherweight line drawing feels effortless, thanks to the pen's high pressure and tilt sensitivity.

WACOM® Cintiq Pro

Bring power to your palettes

Keep complete control of your color-critical workflow with authentic and consistent real-world colors from start to finish. High coverage of Adobe RGB and motion picture industry standard DCI-P3 provide artists with wider color gamuts and a larger breadth of colors to work with. Our Pantone™ Validated and Pantone SkinTone™ Validated certified displays ensure that the color you see on screen matches real life skin tones and prints.

More screen, less space

The super slim bezel along with the innovative position of the ExpressKeys™, combine for a smaller device that fits more desks.

Sustainable by design

Wacom Cintiq Pro and its packaging use recycled materials wherever possible, making this the most sustainable Cintiq Pro ever.

*Wacom Cintiq Pro Stand sold separately and available for Cintiq Pro 27, 22 and 17. Cintiq Pro 17 comes with an Easy Stand in the box which offers a single angle of use

** Sold separately. Monitor arm required for 180 degrees of display rotation (Landscape to Portrait): VESA 75 x 75 mm for Cintiq Pro 17

*** Sold separately; Extension Table not available for Cintiq Pro 17
