## The Most Powerful Smart Glasses Available for Frontline Workers.

RealWear, a global wearable computer company, is focused on empowering more than 2 billion frontline workers with the best wearable technology solutions to help with job safely and productively. With customers like Ford and Goodyear, RealWear are considered the gold standard industrial smart glasses across a variety of industries.

The RealWear [Navigator 520](#) and AI-enhanced [Navigator Z1](#) smart glasses both offer hands-free technology to get job done safely. They provide easy access to external support and expertise; especially when frontline workers perform their task alone, often with poor connectivity and in hazardous environments.

- **Hands Free:** Improves worker safety while freeing up hands to operate equipment or climb ladders.
- **Rugged Construction:** Dependable for any environment to give you confidence to succeed.
- **Extends Edge of Computing:** Instant access to information improves productivity, saves costs, reduces errors and equipment downtime.
- **Enterprise Ready:** With hardware purpose-built for commercial use, combined with enterprise-class solutions from Lenovo, customers have industry-leading options to benefit their business.

**Engage, empower & elevate the modern industrial worker to reach their greatest potential.**
