Adapter USB 3.0 C/m - HDMI/VGA/USB

Article number: 4359916

The new USB-C to HDMI, VGA and USB 3.0 adapter with high quality and lightweight housing and Power Delivery socket for USB-C power adapters with up to max. 87 W input power. The latest generation adapter supports Ultra HD resolution with HDMI 3840 x 2160 at 30 HZ and Full HD resolution with VGA with up to 1920 x 1080. When using both displays at the same times, resolution is limited to Full HD and the same image will be shown on both. To make sure you don't lose power in the middle of an important presentation, the adapter can also simultaneously deliver power to a MacBook, MacBook Pro, iPad Pro, USB-C notebook, tablet or smartphone.

- Type C multi-port adapter with HDMI and VGA video output
- Supports data transfer rates of up to 5 Gb/s
- USB 3.0 port for connecting peripherals
- Power Delivery input up to max. 87 W - Output power slightly less at approx. 78 W when used with a MacBook Pro 2018.
- Can be used with Windows and Mac OS operating systems
- 3840 x 2160 at 30 Hz with HDMI when only HDMI is used
- up to 1920 x 1080 (VGA), or 1920 x 1080 each when using both ports simultaneously
- Simultaneous use of HDMI and VGA possible (splitting mode)
- Silver aluminium housing
- No drivers or other software needed

Specifications

Product type	USB Converter
Cable length	0.1 m
