CadMouse Pro Wireless Left - The Left-Side Solution for CAD Professionals

Product Copy – Short

CadMouse Pro Wireless Left is the full-size, ergonomically superior, left-side solution for CAD professionals. It provides left-handed users a precision CAD tool designed with them in mind and helps heavy CAD users avoid Chronic Repetitive Strain Injury (RSI) by offering a left-side transition.

CadMouse Pro Wireless Left is the mainstay of any CAD toolkit, and the perfect companion to the SpaceMouse line of 3Dconnexion products.

Product Copy – Mid-Length

CadMouse Pro Wireless Left is the full-size, left-side solution for modern CAD professionals. It not only gives left-handed users a precision CAD tool designed with them in mind, but CAD professionals who require a left-side transition to avoid the Chronic Repetitive Strain Injury (RSI) so many experience through long hours of repetitious hand and wrist movement.

The perfect companion for the SpaceMouse line of 3Dconnexion products, CadMouse Pro Wireless Left rounds out the most intuitive, natural workflow in any CAD environment. Ideal button distribution, a dedicated middle mouse button, an angled shape for a more natural hand placement and a tactile, intelligent scroll wheel combine to create a superior ergonomic design. It's an

experience that greatly reduces the discomforts encountered during long CAD sessions with standard mice.

With up to three months of use between recharges* thanks to its rechargeable lithium polymer battery, and three ways to connect, CadMouse Pro Wireless Left grants the flexibility and freedom CAD experts need in the modern landscape of CAD workspaces.

*Battery life based on 8 hours per day, 5 days per week use

CadMouse Pro Wireless Left – The Left-Side Solution for CAD Professionals

CadMouse Pro Wireless Left is the full-size, left-handed solution for modern CAD professionals who prefer or require a left-handed mouse. Offering 3Dconnexion's exceptional precision technology in a left-handed body, CadMouse Pro Wireless Left is the mainstay of any modern CAD toolkit.

Advanced Ergonomics for Left-Side Needs

CadMouse Pro Wireless Left not only gives left-handed users a full-size precision CAD tool designed with them in mind, but just as important, offers CAD professionals a left-side transition to avoid the chronic Repetitive Strain Injury (RSI) many experience through long hours of repetitious hand, finger and wrist movement.

Teaming CadMouse Pro Wireless Left with the extra ergonomic support of a SpaceMouse product on the right side, users with repetitive movement injuries can take full advantage of the combined benefits of these devices to their workflow, **helping them return to increased productivity levels.**

Purpose-built for supremely comfortable use over long CAD sessions, CadMouse Pro Wireless Left is designed with an angled shape and incurvated thumb rest, allowing the hand to sit in its natural position when gripping the mouse body. Buttons are placed ideally for the least amount of finger movement, while the large intelligent scroll wheel's high-quality material offers a tactile feeling of control. Together, these create an experience that greatly reduces the discomfort encountered during long CAD sessions and offers a perfect companion to the highly ergonomic SpaceMouse line of 3Dconnexion products for the most natural, intuitive workflow in any CAD environment.

Exceptional Precision, Powerful Durability

Built to the specifications of high-use CAD professionals, CadMouse Pro Wireless Left produces zero smoothing, acceleration or filtering for precise results on even the most technical projects. With a high-resolution sensor, and an adaptive polling rate up to 1,000Hz, CadMouse Pro Wireless Left is ideal for the CAD professional's day-to-day needs.

Complimenting this built-in precision, 3Dconnexion designed CadMouse Pro Wireless Left with the durability to withstand up to 50 million clicks to its main buttons, a necessity for CAD professionals working an eight-hour plus workday. Its Low-friction polytetrafluoroethylene (PTFE) feet are wear resistant, meaning smooth, precision movements long after the average mouse. 3Dconnexion supports CadMouse Pro Wireless Left with a 3-year warranty. This, combined with its built-to-last

design, means CAD professionals will experience high-quality use of their CadMouse Pro Wireless Left for many years.

Flexible Connectivity, Optimal Battery Life

Either via Bluetooth® Low Energy, the 3Dconnexion Universal Receiver, or micro USB cable, CadMouse Pro Wireless Left offers triple connectivity. Its rechargeable lithium polymer battery provides up to three months of use between charges*, giving busy CAD professional's extended use without being preoccupied with how much power is left in their mouse.

*Battery life based on 8 hours per day, 5 days per week use

Navigation and Applications, Simplified

CAD users zoom in and out of their models and drawings hundreds of times a day. The QuickZoom feature of CadMouse Pro Wireless Left makes this process beyond easy. Press the thumb buttons to zoom in and out of the cursors position; fine tune the zoom level by keeping the corresponding button pressed.

The improved Smart Mouse Wheel 2 gives users precise click-to-click zooming in CAD applications, with adjustable smart scrolling speed with inertia in documents and browsers. This is ideal for interacting with many-paged documents, allowing the user to find specific pages quickly and accurately with ease.

Positioned directly behind the Smart Scroll Wheel, the Gesture Button opens an application or environment-specific radial menu to give users access to their favorite commands with a simple mouse gesture. 3DxWare 10 software allows for custom radial menus specific to user needs.

Carry Case Included

The compact, lightweight, semi-rigid 3Dconnexion carry case provides a safe way to transport CadMouse Pro Wireless Left with ease and safety; a must-have for the modern, mobile CAD workstation.

Features and Functions

- Left-handed ergonomic design
- 7 buttons (including dedicated middle mouse button, 5 programmable buttons)
- Ergonomic shape for comfortable CAD sessions
- Triple connectivity: Wireless with Universal Receiver, Bluetooth or cabled
- High resolution, energy saving optical sensor
- Rechargeable battery lasting up to three months between charges
- Specially developed PTFE feet
- Customizable radial menu
- Smart Mouse Wheel 2
- QuickZoom

Technical Specifications

- High resolution optical sensor with 7,200 DPI
- Rechargeable lithium polymer battery with 1100 mAh
- 3Dconnexion® 2.4GHz wireless technology
- Bluetooth® Low Energy
- Adaptive polling rates with 90Hz (Bluetooth), 125Hz (Universal Receiver) and 1,000Hz (cabled)
- Dimensions (LxWxH): 126 mm x 74 mm x 44 mm / 5.0" x 2.9" x 1.7"
- Weight: 140 g / 0.31 lb / 4,94 oz

Supported Operating Systems

Microsoft Windows 10, Microsoft Windows 8.1, Microsoft Windows 7
Mac OS 10.10 or greater

Package Contents

CadMouse Pro Wireless Left
Carry case
2.4 GHz USB Universal Receiver
Braided micro USB cable 1,5 m

Certifications and Registrations

CE, FCC, RCM, BSMI, ROHS, WEEE, NCC, MIC, IC

Warranty

3-years limited hardware warranty
