SMART
SECURITY

PREMIUM

Built without compromise for users who want it all, including advanced threat detection, extra theft protection and easy password management.

The ultimate cyber protection

State-of-the-art technology for advanced users, built on a perfect balance of speed, detection and usability.

First-class protection tailored personally to you

Stay protected even against new and emerging threats or in the event of data theft or laptop loss. Remember only one password to keep all your passwords secure.

Secure your treasured data

Encrypt your files and removable media. Protect them against theft or loss. Ensure secure collaboration and data sharing.

110M+

protected users worldwide

100+

prestigious VB100 awards

30+

years of cutting-edge cybersecurity

Award-winning protection

ESET ranks among the best in the industry, as evidenced by our multiple awards and certifications from organizations like AV-TEST and AV-Comparatives.

State-of-the-art technology

Advanced Machine Learning, DNA Detections and a cloud-based reputation system are just some of the cutting-edge tools developed in our 13 R&D centers.

Made in the European Union

ESET values, like integrity, social responsibility and independence, all stem from our European roots and are safeguarded by our private ownership structure.

Making the internet safer for you to enjoy

Explore the great online, securely protected by ESET's award-winning detection technology. It's trusted by over 110 million users worldwide to detect and neutralize all types of digital threats, including viruses, rootkits, worms and spyware. It also protects against techniques that seek to evade detection, and blocks targeted attacks and exploits.

Antivirus and Antispyware	Provides proactive protection against all types of online and offline threats and prevents malware spreading to other users.
Advanced Machine Learning	In addition to ESET Machine Learning in the cloud, this proactive layer runs locally. It is specifically designed to detect advanced, never-before-seen malware, while having a low impact on performance.
Exploit Blocker <small>IMPROVED</small>	Blocks attacks specifically designed to evade antivirus detection, and eliminates lockscreens and ransomware. Protects against attacks on web browsers, PDF readers and other applications, including Java-based software.
Advanced Memory Scanner	Enables improved detection of persistent malware that employs multiple layers of encryption to conceal its activity.
Cloud-Powered Scanning	Speeds up scans by whitelisting safe files based on the ESET LiveGrid® file reputation database. Helps to proactively stop unknown malware based on its behavior, by comparing it with our cloud-based reputation system.
Scan While Downloading Files	Decreases scanning time by scanning specific file types – such as archives – during the download process.
Idle-State Scanning	Aids system performance by performing in-depth scans when your computer is not in use. Helps detect potential inactive threats before they can cause damage.
Host-Based Intrusion Prevention System (HIPS) <small>IMPROVED</small>	Lets you customize the behavior of the system in greater detail, with a focus on behavioral detection. Gives you the option to specify rules for system registry, active processes and programs in order to fine-tune your security posture. Employs the latest tracing capabilities to scan parts of memory that can be modified by sophisticated malware injection techniques.
Script-Based Attack Protection	Detects attacks by malicious scripts that try to exploit Windows PowerShell. Also detects malicious JavaScripts that can attack via your browser. Mozilla Firefox, Google Chrome, Microsoft Internet Explorer and Microsoft Edge browsers are all supported.
UEFI Scanner	Protects from threats that attack your computer on a deeper level, even before Windows starts - on systems with the UEFI system interface.
WMI Scanner	Looks for references to infected files or malware embedded as data in Windows Management Instrumentation, a set of tools that manages devices and applications in a Windows environment.
System Registry Scanner	Looks for references to infected files or malware embedded as data in the Windows System Registry, a hierarchical database that stores low-level settings for the Microsoft Windows operating system and for applications that opt to use the registry.
LiveGuard <small>NEW</small>	A new service that is personalized to you, designed to discover and stop never-before-seen types of threats. Handles a wide range of file types, including documents, scripts, installers and executable files. Suspicious files are run in a safe, sandboxed environment within the ESET HQ Cloud.

Protect your privacy

Stop hackers from misusing your passwords and stay safe while online banking, making online payments and accessing web-based crypto-wallets. Enjoy safer connections, protect your webcam and home Wi-Fi router from intruders, and protect your private data from ransomware. Encrypt your files and removable media (USB keys) to safeguard your privacy. Control privacy threats by actively testing your router-connected smart devices.

Secure Data PREMIUM	Lets you encrypt files and removable media (e.g. USB keys) for ultra-secure safeguarding of your data and then you can be decrypt them on any Windows device. Protects against data theft in the event of USB-key or laptop loss, and allows secure collaboration and data sharing.
Password Manager PREMIUM IMPROVED	Helps you store and organize passwords, automatically fill in forms and generate extra strong encrypted passwords. All you need to remember is your master password. You can also logout from every website and secure your browsing history remotely, stay informed about your account security with Security Report and receive security alerts when your passwords are at risk. iOS face detection is integrated and two-factor authentication (2FA) with Google Authenticator can be incorporated to further improve your passwords' security.
Ransomware Shield IMPROVED	Blocks malware that tries to lock you out of your personal data in order to demand a 'ransom' payment. Employs advanced behavior-based detection techniques to protect against malware that tries to damage devices by encrypting as many files as it can locate on local and network drives.
Webcam Protection	Constantly monitors all the processes and applications running on your computer, to see which ones want to use your webcam. It alerts you to any that unexpectedly try to access your webcam, and lets you block them.
Network Inspector	Enables you to test your home router for vulnerabilities, such as weak passwords or out of date firmware, and provides you with an easy-to-access list of router-connected devices (smartphones, smart devices) with improved device detection, to show you who's connected (device name, IP address, MAC address etc.). Enables you to scan smart devices for vulnerabilities, and gives you suggestions on how to fix possible issues.
Firewall	Prevents unauthorized access to your computer and misuse of your personal data.
Network Attack Protection	In addition to Firewall, automatically protects your computer from malicious network traffic, blocking threats revealed by dangerous traffic patterns.
Banking & Payment Protection IMPROVED	Features a special secured browser through which you can safely pay online and run any supported browser in secured mode by default (after setup). Automatically protects you while internet banking and accessing web-based crypto-wallets. Encrypts communications between the keyboard and the browser for safer transactions and notifies you when using the feature on public Wi-Fi. Protects you from keyloggers.
Botnet Protection	An added layer of security that protects against botnet malware – preventing your computer from being misused for spam and network attacks. Benefit from a new type of detection thanks to Network Signatures, for even faster blocking of malicious traffic.
Anti-Phishing	Protects your privacy and assets against attempts by fraudulent websites to acquire sensitive information such as usernames, passwords or banking details, or feed you fake news from seemingly reputable sources. Protects you from homoglyph attacks (replacing characters in links with ones that look similar but are actually different).
Out-of-Home Network	Alerts you when connecting to an unknown network and prompts you to switch to the Strict Protection mode. Makes your device invisible to other computers connected to the same network.
Device Control	Allows you to prevent unauthorized copying of your private data to an external device. Allows you to block storage media – CDs, DVDs, USB sticks, and disk storage devices. Lets you block devices connecting via Bluetooth, FireWire and serial/parallel ports.
Antispam	Keeps unwanted emails from clogging your mailbox.

Enjoy the full power of your computer

Leaving more power to the programs you use daily, ESET Smart Security Premium lets you play, work and browse the internet without slowdowns. Stay unplugged and online longer with battery-saving mode and enjoy gaming without distracting pop-ups.

Anti-Theft – Stay safer by tracking and locating your missing computer

Protect your laptop in case it gets lost or stolen, and increase the chances of its retrieval.

Keep your kids safe on the internet

Show kids only the good side of the internet with Parental Control, preventing them from being exposed to offensive online content. Block more than 20 website categories, or add individual sites to the blacklist.

Small System Footprint

Maintains high performance and extends the lifetime of hardware.
Fits any type of system environment.
Saves internet bandwidth with extremely small update packages.

Gamer Mode

ESET Smart Security Premium automatically switches to silent mode if any program is run in full-screen. System updates and notifications are postponed to save resources for gaming, video, photos or presentations.

Portable Computer Support

Postpones all non-actionable pop-up windows, updates and system-hungry activities to preserve system resources so that you can stay online and unplugged longer.

Location Tracking

Lets you mark a device as missing via the ESET® Anti-Theft web interface at ESET HOME to initiate automatic monitoring. Displays position on a map based on the Wi-Fi networks in range when the device comes online. Allows you to access the gathered information via ESET Anti-Theft at home.eset.com.

Laptop Activity Watch

Allows you to watch thieves via your laptop's built-in camera. Collects snapshots of the missing laptop's screen. Saves all recent photos and snapshots to the web interface at home.eset.com.

Anti-Theft Optimization

Lets you easily set up/configure Anti-Theft for maximum protection of your device. Makes it easy to configure Windows auto-login and operating system account passwords. Helps you increase the level of security by prompting you to modify key system settings.

One-Way Messaging

At home.eset.com, create a message and have it displayed on your missing device – to increase the chances of its retrieval.

Parental Control

Gives you the option to choose from predefined categories according to the age of your kids. Lets you set a password to protect settings against modification as well as prevent unauthorized product uninstallation.

Manage and maximize your security with ESET HOME

ESET HOME is a web portal and mobile app for Android and iOS that provides comprehensive oversight of ESET products, licenses and services on your devices. It's designed to be accessible whenever you need it, wherever you go. Get important security and license notifications, and check the security status of protected devices at any time. Install protection for new devices without typing your license key or login. Upgrade and renew your licenses. Add, manage and share licenses with family and friends. Manage Anti-Theft, Parental Control and Password Manager via the ESET HOME portal. All this and more is now available to you in one place, at any time.

Install and forget, or customize to meet your exact requirements

Delivering top protection right from the start with its default settings, ESET Smart Security Premium keeps you informed about potential security issues and lets you address them directly from the main screen. Its sleek user interface is designed to let you easily set up all routine tasks.

Devices	Connect Windows and Android devices to your account via QR code, including Windows devices remotely, and check their security status at all times. Download and install protection for new devices and instantly secure them against threats.
Licenses	Add, manage and share licenses with family and friends. Upgrade and renew when necessary, and control at all times who else can use your license.
Notifications	Device, license and account notifications are part of both the portal and the mobile app. In addition to security and license information, available actions are detailed (only for Windows and Android OS).
One-Click Solution	Lets you view your protection status and access the most frequently used tools from all screens. Offers comprehensive, one-click solutions to potential issues.
Smooth Product Upgrades	Benefit from new protection technologies as soon as they become available, for a continuously high level of security.
Settings for Advanced Users	Offers in-depth security settings to fit your needs. Allows you to define maximum scanning depth, scanning time, size of the scanned files and archives, and much more.
ESET SysInspector®	An advanced diagnostic tool that captures critical information from the system to troubleshoot a broad range of security and compatibility issues.
Security Report	Gives you a monthly insight into how ESET protects your computer. This summary includes information about detected threats, blocked web pages, intercepted spam emails, blocked webcam accesses and more.

MULTIPLATFORM SOLUTION

Secure all your devices

Whether you run a PC, Mac or Android smartphone, tablet or TV, protect them all with ESET's highest level of security.

Protect your children online

With **ESET Parental Control for Android**, which comes as part of ESET Internet Security and covers multiple kids' devices, you can help your children manage their online experiences safely – and in a child-friendly way that they will understand.

One convenient license

A single license covers all your devices, and protection can be transferred at any time to a new device without the hassle of getting a new license.

Manage your security with ESET HOME

ESET HOME is a web portal and mobile app for Android and iOS that provides comprehensive oversight of ESET products, licenses and services on your devices. It's designed to be accessible whenever you need it, wherever you go.

CHOOSE THE SECURITY YOU NEED. PROTECT 5 OR 3 DEVICES.
