

The smarter choice
to suit every need

Why choose Epson?

Our goal

We strive to achieve sustainability and enrich local communities.

Sustainability features in every aspect of our business. Among other things, Epson achieved EcoVadis Platinum status in 2020. This rating places us in the top one per cent in sustainability for companies in our industry globally.

Our commitment

We recognise that we have a responsibility to build a better tomorrow, today. In fact, in 2020 alone, Epson recycled **17,297,058kg of WEEE** (Waste Electrical and Electronic Equipment), **19,635kg of batteries** and **810,514kg of plastic**¹.

Our innovative technology

We create our own technology. Unlike most of our competition, we don't use heat in our print technology. This means we save energy and achieve better sustainability, end users see fewer consumables and you achieve additional profitability.

We use 3LCD technology, using up to **25% less electricity**² whilst offering end users up to **three times brighter colours**³ and additional profitability.

Epson is the clear brand of choice for profitability, sustainability and quality.

Up to
83%
less energy and CO₂
emissions compared to
laser printers⁴

Up to
96%
fewer used consumables
than laser printers⁵

Up to
25%
less electricity per lumen
of brightness²

Up to
3x
brighter colours with
Epson projectors³

We've changed printing forever

With Epson, there is a choice of print solution to offer end users: standard cartridge and ink tank printers.

Customers looking to achieve longer term cost savings should consider our EcoTank range. EcoTank printers feature a large ink tank that you fill with the included ink bottles instead of cartridges. There is enough ink included to print up to 14,000 pages⁶. One set of ink bottles is equivalent to 72 ink cartridges⁷, which makes a big difference in terms of both waste and transportation. What's more, delivery costs can be cut down, due to fewer shipments required, which also reduces the amount of time that needs to be spent packaging cartridges for shipping.

Customers with a budget looking to spend smaller amounts up front can select from our wide range of sustainable, cost saving cartridge products. Compared to laser printers, Epson inkjet printers reduce energy usage and waste, while boosting productivity, without sacrificing quality. In addition, the inks can be purchased individually, meaning that only the colours used need to be replaced.

With both options available, Epson has the right solution for every situation.

How to choose the right printer

From home office to large enterprise use, Epson offers a wide range of inkjet printers that can help save money, time and unnecessary hassle to help business grow. From EcoTank to WorkForce Enterprise, each range offers unique features. Use this guide to help select the right printer to suit customer needs.

Release the potential of a dynamic workflow

Improve business efficiencies with the support of a global leader in scanning solutions. An essential part of modern living is the ability to transform physical documents into useable data. Whether at home, on the road, in a reception or at your office desk, Epson has a wide range of award winning scanners to enhance the digitisation process.

In stark contrast to previous years, today, not all employees are based in an office, presenting a challenge in document sharing, handling and security. Epson's powerful and easy to use solutions, make it simple for remote workers to set up and utilise their scanners effectively.

Whether wanting to operate from the scanner itself or a computer it is possible to capture, share and distribute documents via FTP, email, SharePoint and the cloud.

The future in projection technology

As the No.1 in the projector market since 2001⁸, we have an extensive knowledge of display solutions. We know that size and clarity matter. Whether in a classroom, a meeting room, studying complex plans and documents, or sitting in your living room, our display solutions deliver a more meaningful experience through large scale, crystal clear images.

No-one sells more projectors than Epson. Why? Because our display solutions bring content to life thanks to bright, vivid and clear images, even in brightly-lit rooms.

We manufacture our own 3LCD technology, delivering up to **three times brighter colours**³ and using **25% less electricity**² per lumen of brightness.

Brightness alone is not enough to bring the true colours you see everyday to life. Following this philosophy, only Epson's 3LCD technology combines brightness and True Colour to create vivid, lifelike images. We do this by making sure the coloured light our projectors show, is just as bright as the white light.

Brighter, vivid projection from Epson

Many of our business display solutions are TCO certified⁹, proving that Epson is the ideal choice for sustainable solutions. TCO Certified is a world-leading global sustainability certification for electronics, founded over 25 years ago. By choosing products with these certifications, you can meet your customers' demands of the present without compromising future generations.

Our commitment to the environment coupled with our own technology make for an unbeatable solution, proving once again that technology can be both sustainable and deliver outstanding results.

Innovative display solutions to leave a lasting impression

We work hard to develop innovative and versatile projectors that meet your needs and allow you to make a lasting impression. Our commitment to product quality, technology, relationships and service and support is the reason we have been market leader for projectors since 2001⁸.

Improve efficiency at the point of sale

Leading the way in visual technology excellence

1 Sum of amount actually collected and expected to be collected.

2 Data source: ProjectorCentral.com, Jan. 2014. Average of 1,243 shipping models for which the manufacturers provided lumens and total power data, all resolutions and brightness levels. Energy efficiency was measured as wattage per lumen. It was measured for both 3LCD and 1-chip projectors in each of five brightness segments. 3LCD projectors averaged less required electricity per lumen in each of the five segments.

3 Colour brightness (colour light output) in brightest mode, measured by a third-party lab in accordance with IDMS 15.4. Colour brightness will vary depending on usage conditions. Top-selling Epson 3LCD projectors versus top-selling 1-chip DLP projectors based on NPD sales data for October 2019 through September 2020.

4 Based on Epson calculations, the Epson WorkForce Pro WF-C8190DW uses 83% less energy than the HP Color LaserJet Enterprise M750dn, the highest-selling model in the A3 colour single-function 21-30ppm printer segment (IDC, Quarterly Hardcopy Peripherals Tracker, Q4 2015 to Q3 2019 shipments, published Q2 2020). Methodology based on 'Typical Energy Consumption', defined under and/or simulated with reference to the ENERGY STAR test procedure and presented in kWh per year.

5 Storage space comparison based on Epson calculations of storage space requirements for packaged consumables sufficient to print 6,000 pages on 12 SFP and MFP (3-in-1) printers selected from among the top-selling 50% of A4 monochrome laser printers (below-20ppm class) listed in IDC Worldwide Quarterly Hardcopy Peripherals Tracker 2019Q2 data FY17 results. Average toner package unit volumes and yields for each model were calculated by Epson using toner package dimensions and yields published by the manufacturer for each model (as of August 2019). Actual size and number of toner cartridges required varies by laser printer model. EcoTank consumables quoted yields are simulated figures calculated by Epson based on ISO/IEC24711 methodology using ISO/IEC19752 test pat.

6 Quoted yields are extrapolated based on Epson original methodology from the print simulation test patterns provided in ISO/IEC 24712 or 29103. Quote yields are NOT based on ISO/IEC 24711 or 20102. Quote yields may vary depending on the images that you are printing, the paper type you are using, the frequency of your prints and environmental conditions such as temperature. During the initial printer setup, a certain amount of ink is used to fill the print head's nozzles, therefore the yield of the initial bundled set will be lower.

7 Average cost per page saving and average number of inkjet cartridges required to print the same number of pages as EcoTank "102" and "104" ink bottles. Comparison between average yield (A4 prints of ISO/IEC 24711) of EcoTank "102" and "104" bottles and the genuine consumables used within the 50 best-selling inkjet cartridge printers (according to GfK Inkjet Printing Devices and Inkjet Printing Cartridges Point of Sale panel market data for Germany, France, UK, Spain and Italy Apr-19 – Mar 2020).

8 2001 to 2020, 500-lumen and above, excluding screenless TVs, Futuresource Consulting – Quarterly Projector Market Insights – Worldwide Analyser CY20Q4.

9 Epson achieved certification by TCO Certified for selected families of projectors. TCO Certified is the world's most comprehensive sustainability certification for IT products, which must meet life cycle criteria for social and environmental sustainability.
