USB Type-A Extension

Article number: see below

The USB 3.0 standard transfers data at up to 5 Gb per second (SuperSpeed) making it up to 10 times faster than USB 2.0, but the connectors require additional contacts. These have been integrated in the Type-A connector in such way that the original form has been retained, which makes it possible for USB 2.0 and 1.1 compatible devices to be operated on USB 3.0 ports, and USB 3.0 devices to be used with older computers.

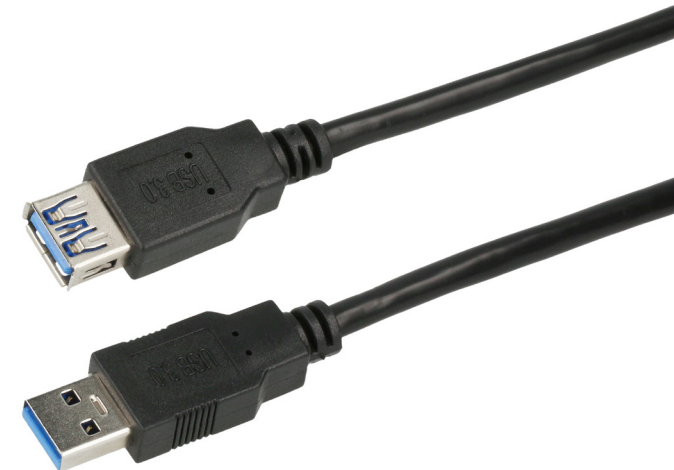

- New USB 3.0 standard with transfer rates up to 5Gbps (SuperSpeed mode)
- Backwards compatible with USB 2.0/1.1 (type-A connector)
- Top quality cable
- USB 3.0 extension cable

Specifications

Product Type	USB Cable
Connectors	Type-A, Type-A Female
Connector gender	Male - female
USB Version	3.0
Transfer rate	5 Gbps
Colour	Black
