Nylon loop – DK 7072.230

created: 15.06.2021 on www.rittal.com/com-en

Product description

Description:	With the nylon loop, secured cables are easily released, allowing individual cables to be added or removed. Ideal for sensitive data cables (fibre-optic/Cu), as it avoids indentations on the cable sheathing. In addition, the nylon loop may be screw-fastened to the round system punchings or attached using a quick-release fastener.
