Fairbuds XL

The Fairbuds XL deliver an immersive sound experience, with strong bass, warm mids and clear bright highs and active noise cancelling supports the listening adventure. They are great for music and even better for people and planet as they are the most sustainable headphones on the market - they're designed with fair and recycled materials, and a long-lasting battery.

They join the family of modularity - we offer replacements from the earpads, to the headband and the battery and many more - our Headphones are built to last... even if you manage to break you headband or wear of your earpads.

You only need to replace what you need. Good for the planet and the wallet.

Available in Black and Green.

RRP ~ 249€

Superior sound, sustainably designed

No distractions

Dive into music with Active Noise Cancelling or let the world in with ambient mode.

Wireless freedom

Seamlessly switch between devices with dual point connectivity.

Powered to last

Keep the music playing up to 30h hours of (exchangeable) battery life.

Big Sound

40mm dynamic drivers deliver clear highs, warm mids and deep bass.

Speckled black / Speckled green

With foldable design

RRP: ~ 249€

Fair & Recycled materials

Fairbuds XL are made using fair and recycled materials like 100% recycled aluminum and tin, 80% recycled plastic as well as 100% Fairtrade Gold

Climate Conscious

New: In designing the Fairbuds XL we've done our best to minimize the impact of our headphones on the climate by avoiding and reducing carbon emissions where possible, as well as contributing to climate projects

Modular Design

These headphones are so much more than the sum of their parts. Your Fairbuds XL headphones come together from 9 modular spare parts, so you can easily repair them yourself. Good for the planet, easy on your wallet.

Spare parts

Fairbuds XL Headphone Battery

RRP ~ 19.95€

The original Fairbuds XL battery comes with all-day power (800 mAh) and is easy to replace in no time - keep that song playing, you'll barely miss a beat.

Fairbuds XL Speaker to Speaker Cable

Black, Copper
RRP ~ 14.95€

This little cable might seem unremarkable, but is secretly the unsung hero of our Fairbuds XL. It connects both speakers and ensures that big stereo sound you've grown to love.

Fairbuds XL Headband Base

Black, Green
RRP ~ 19.95€

Let's walk through this together: The headband base connects to the headband, which is covered by the headband cover. Head on over to the details below to find out more.

Spare parts

Fairbuds XL Speaker Right

Black, Green
RRP ~ 79.95€

Dance like nobody's watching, but only if both speakers are singing along. Seriously though, this technical marvel is where the sound magic happens and if need be, you can easily replace it yourself

Fairbuds XL Headband

Black, Green
RRP ~ 19.95€

Not enough can be said about this champion of a spare part. Let's just agree that this band puts the head in headphones, holding your Fairbuds XL together and guaranteeing comfort.

Fairbuds XL Headband Cover

Black, Green
RRP ~ 19.95€

With the headband cover's artificial leather cushion comfort, you'll never want to take your Fairbuds XL off

Spare parts

Fairbuds XL Ear Cushion

Black, Green
RRP ~ 14.95€

That snug, comfortable fit you're used to is all thanks to these artificial leather ear cushions. When the time comes to replace them, all it takes is a quick twist, a swap and another twist

Fairbuds XL Speaker Covers (L&R)

Black, Green
RRP ~ 5.95€

As far as earcap covers go, these are about as remarkable as they come. They're made from recycled plastics, protect the inner workings of your Fairbuds XL and look good doing it. Well worth replacing, if it ever comes to it.

Fairbuds XL Speaker Left

Black, Green
RRP ~ 39.95€

Dance like nobody's watching, but only if both speakers are singing along. Seriously though, this technical marvel is where the sound magic happens and if need be, you can easily replace it yourself

Accessories

Fairbuds XL Headphones 1.5m audiojack-to-USB-C cable

RRP ~ 12.95 €

The name of this multi-talent of a cable doesn't leave much to the imagination. It serves as an audio wire for cabled listening.
