CONTROL AND PRECISION

The GP2 is a mousepad for gamers who want enhanced control over their swipes and flicks. It features a slightly coarser cloth surface, optimized for precision in every mouse movement.

“Since precision is key, the mousepad is an extremely important piece of equipment. I’m using the GP2 because of the material selection and the friction of the surface – it’s just right for me.”

Dennis “dennis” Edman, professional CS:GO player
