# **OVERVIEW**

The Cisco UCS 6454 Fabric Interconnect is a core part of the Cisco Unified Computing System, providing both network connectivity and management capabilities for the system (*Figure 1*). The Cisco UCS 6454 offers line-rate, low-latency, lossless 10/25/40/100 Gigabit Ethernet, Fibre Channel over Ethernet (FCoE), and Fibre Channel functions.

Cisco UCS 6454 provides the management and communication backbone for the Cisco UCS B-Series Blade Servers, UCS 5108 B-series server chassis, UCS Managed C-Series rack servers, and UCS S-Series storage servers. All severs attached to the Cisco UCS 6454 Fabric Interconnect become part of a single, highly available management domain. In addition, by supporting unified fabric, the Cisco UCS 6454 provides both the LAN and SAN connectivity for all servers within its domain.

From a networking perspective, the Cisco UCS 6454 uses a cut-through architecture, supporting deterministic, low-latency, line-rate 10/25/40/100 Gigabit Ethernet ports, switching capacity of 3.82 Tbps, and 160 Gbps bandwidth between FI 6454 and IOM 2208 per 5108 blade chassis, independent of packet size and enabled services. The product family supports Cisco® low-latency, lossless 10/25/40/100 Gigabit Ethernet unified network fabric capabilities, which increase the reliability, efficiency, and scalability of Ethernet networks. The Fabric Interconnect supports multiple traffic classes over a lossless Ethernet fabric from the server through the Fabric Interconnect. Significant TCO savings come from an FCoE optimized server design in which network interface cards (NICs), host bus adapters (HBAs), cables, and switches can be consolidated.

### Cisco UCS 6454 54-Port Fabric Interconnect

Cisco UCS 6454 54-Port Fabric Interconnect (Figure 3) is a one-rack-unit (1RU) 10/25/40/100 Gigabit Ethernet, FCoE and Fiber Channel switch offering up to 3.82 Tbps throughput and up to 54 ports. The switch has 36 10/25-Gbps Ethernet, 4 1/10/25-Gbps Ethernet, 8 10/25-Gbps Ethernet or 8/16/32-Gbps Fiber Channel ports and 6 40/100-Gbps Ethernet uplink ports. All Ethernet ports are capable of supporting FCoE.

The 54-port chassis is shown in *Figure 1*.

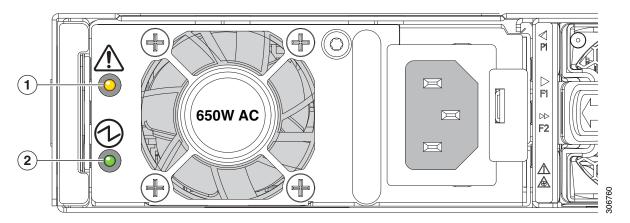

Figure 4 AC Power Supply for the Cisco UCS 6454 Fabric Interconnect Front View

1	Amber fault/error LED	2	Green power on LED
---	-----------------------	---	--------------------

### Power Supply LEDs

The power supply LEDs are located on the left front portion of the power supply. Combinations of states indicated by the Okay ( ) and Fault ( ) LEDs indicate the status for the module as shown in the *Table 1* 

Table 1	power	supply	LED	states
	pono.	June Providence		010100

Power on LED	Error LED	Status
Green	Off	Power supply is on and outputting power to the switch.
Flashing green	Off	Power supply is connected to a power source but not outputting power to the switch—power supply might not be installed in the chassis.
Off	Off	Power supply is not receiving power.
Green	Flashing amber	<ul> <li>Power supply warning—possibly one of the following conditions:</li> <li>High voltage</li> <li>High power</li> <li>Low voltage</li> <li>Power supply installed in chassis but not connected to a power source</li> <li>Slow power supply fan</li> </ul>
Flashing green	Amber	<ul> <li>Power supply failure—possibly one of the following conditions:</li> <li>Over voltage</li> <li>Over current</li> <li>Over temperature</li> <li>Power supply fan failure</li> </ul>

### Management Port LEDs

The management port LED states are shown in Table 2.

LED Position	LED State	Description
Left	Off	No link
	Solid green	Physical link
Right	Off	No activity
	Blinking green	Activity

#### Table 2 Management Port LED States

### Beacon and System Status LEDs

The beacon and system status LED states are shown in Table 3.

Table 3	Beacon and Sy	ystem Status LED S	tates
	Boabon ana o	jotonn otatao EED o	tu too

LED	Location	Function	Color	State	Description
Beasen LED Front		Identify			Chassis is selected
Beacon LED	and rear	selected chassis	Blue	Off	Chassis is not selected
	System System Front power/health status LED and rear during boot up and run time	Groop	Solid on	Normal operation	
			Green	Off	System is powered off
			Amber	On	System fault
		Red	Solid on	Power shut down by software	
			Reu	Blinking	Secure boot validation has failed

### System Environment LEDs

The system environment LED states are shown in *Table 4*.

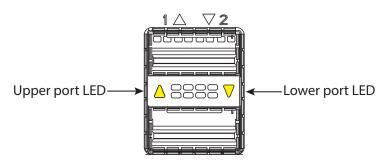

#### Table 4 System Environment LED States

LED State	Description
Solid Amber	Minor fan alarm (one fan missing or failure
Solid red	Major fan alarm (two more fans missing or failed, or fan direction mismatch)

### SFP28 Port LEDs

*Figure 5* is an detailed view of a dual SFP28 port and its LEDs.

#### Figure 5 SFP28 Port LEDs

The port LED states are shown in *Table 5*.

#### Table 5 SFP28 Port LED States

LED State	Description
Yellow	Enabled (but SFP not inserted)
Green	Enabled (and link is up)
Off	Enabled (but link not connected)
Blinking yellow	Power On Self Test (POST) failed
Blinking yellow	Port beacon enabled
Yellow	Administrative (software shut down)

### L1/L2 Port LEDs

The L1/L2 port LED states are shown in *Table 6*.

#### Table 6 L1/L2 Port LED States

LED Position	LED State	Description
Left	Off	No link
	Solid green	Physical link
Right	Off	No activity
	Blinking green	Activity

### Ethernet Port (ports 1-54) LEDs

The port 1–54 LED states are shown in *Table 7*.

#### Table 7 L1/L2 Port LED States

LED Position	LED State	Description
Left	Off	No link
	Solid green	Physical link
Right	Off	No activity
	Blinking green	Activity

# **DETAILED REAR VIEWS**

### Cisco UCS 6454 54-Port Fabric Interconnect Rear View

*Figure 6* is an overall rear view of the Cisco UCS 6454 Fabric Interconnect.

#### Figure 6 6454 54-port Fabric Interconnect Chassis Overall Rear View

# CISCO UCS 6454 FABRIC INTERCONNECT CAPABILITIES and FEATURES

*Table 8* lists the capabilities and features of the Cisco UCS 6454 Fabric Interconnect. Details about how to configure this Fabric Interconnect series for a particular feature or capability are provided in *CONFIGURING the FABRIC INTERCONNECT on page 10*.

#### Table 8 Capabilities and Features

Capability/Feature	Cisco UCS 6454 54-Port	
Chassis	1RU 54-port Fabric Interconnect	
Throughput	3.82 Tbps switching performance	
Fan Modules	Four variable speed fans	
Unified Ports	8	
Power Supply	Two Power Supplies (AC or DC)	
Management by Cisco UCS Manager	Increases flexibility with a range of interconnect solutions, including copper Twinax cable for short runs and fiber for long runs	
	Consumes less power per port than traditional solution	
	Helps enable cost-effective connections on fabric extenders with Cisco Fabric Extender Transceiver (FET) optics	
	Allows all elements connected to the interconnects to participate in a single, highly available management domain	
	<b>NOTE:</b> The 6454 Fabric Interconnects require UCS Manager version UCS 4.0 (1) or later	
Unified Fabric	Decreases total cost of ownership (TCO) by reducing the number of NICs, HBAs, switches, and cables needed	
	Transparently encapsulates Fibre Channel packets into Ethernet	
Fabric Extender Architecture	Scales to 20 chassis without adding complexity by eliminating the need for dedicated chassis management and blade switches and by reducing the number of cables needed	
	Provides deterministic latency for optimized application performance	
SFP+ ports Increases flexibility with a range of interconnect solutions, copper Twinax cable for short runs and fiber for long runs		
	Consumes less power per port than traditional solutions	
	Helps enable cost-effective connections on fabric extenders with Cisco Fabric Extender Transceiver (FET) optics (see <i>Table 12 on page 13</i> ).	

Capability/Feature	Cisco UCS 6454 54-Port	
SFP-compatible ports	Allows fixed ports to be configured to operate in 10/25/40/100 Gigabit Ethernet mode with the transceiver options specified for use with SFP-compatible ports in	
QSFP-compatible Ports	Allows all ports to be configured to operate in 40-Gbps or 100-Gbps Ethernet mode with the transceiver options specified for use with QSFP28 compatible ports (see <i>Table 12 on page 13</i> ).	
Transceivers	The Cisco UCS 6454 supports a wide variety of 10/25/40/100 Gigabit Ethernet connectivity options using Cisco 10/25/40/100 Gbps modules. Unified ports (UP) on the Cisco UCS 6454 support 10/25 Gigabit Ethernet connectivity or 8/16/32 Gigabit Fibre Channel.	
Port-based Licensing	Helps enable a pay-as-you-go model, allowing customers to add capacity as the networking needs of an individual system increase	
Front-to-Back Cooling	Fan side intake, port side exhaust	
Redundant hot-swappable fans and power supplies	<ul> <li>Helps enable high availability in multiple configurations</li> <li>Increases serviceability</li> <li>Provides uninterrupted service during maintenance</li> </ul>	
Rear Ports	Helps keep cable lengths short and efficient	
Performance	Provides high-speed, low-latency connectivity to the chassis	
	<ul> <li>Provides approximately 50% reduction in end-to-end system latency (latency is less than 1 microseconds)</li> </ul>	
Lossless Fabric	Provides a reliable, robust foundation for unifying LAN and SAN traffic on a single transport	
Priority Flow Control (PFC)	Simplifies management of multiple traffic flows over a single network link	
	Supports different classes of service, helping enable both lossless and classic Ethernet on the same fabric	
Systemwide Bandwidth Management	Helps enable consistent and coherent quality of service (QoS) throughout the system	

Table 8 Capabilities and Features (continued)

# **CONFIGURING the FABRIC INTERCONNECT**

Follow these steps to configure the Cisco UCS 6400 Series Fabric Interconnect:

- STEP 1 VERIFY FABRIC INTERCONNECT SKU, page 11
- STEP 2 CHOOSE PORT LICENSES (OPTIONAL), page 12
- STEP 3 CHOOSE TRANSCEIVERS (OPTIONAL), page 13
- STEP 4 CHOOSE POWER SUPPLIES, page 17
- **STEP 5 SELECT AC POWER CORDS**, page 18
- STEP 6 ACCESSORY KIT (INCLUDED), page 21
- STEP 7 CHOOSE SERVICE AND SUPPORT LEVEL, page 22

### STEP 1 VERIFY FABRIC INTERCONNECT SKU

Verify the product ID (PID) of the desired Fabric Interconnect as shown in Table 9.

Table 9 PID of the Base 6454 Fabric Interconnect

Product ID (PID)	Description
UCS-FI-6454-U	Standalone model: UCS 6454 1RU Fabric Interconnect, with no PSU, with 54 ports and includes 18x10/25-Gbps and 2x40/100-Gbps port licenses
UCS-FI-6454++	Standalone model: TAA-UCS 6454 1RU Fabric Interconnect, with no PSU, with 54 ports and includes 18x10/25-Gbps and 2x40/100-Gbps port licenses
UCS-FI-6454-CH	Standalone model: DISTI-UCS 6454 1RU Fabric Interconnect, with no PSU, with 54 ports and includes 18x10/25-Gbps and 2x40/100-Gbps port licenses
UCS-FI-6454-U-BR	Standalone model: Brazil-UCS 6454 1RU Fabric Interconnect, with no PSU, with 54 ports and includes 18x10/25-Gbps and 2x40/100-Gbps port licenses
UCS-FI-6454=	Standalone model: Spare-UCS 6454 1RU Fabric Interconnect, with no PSU, with 54 ports and includes 18x10/25-Gbps and 2x40/100-Gbps port licenses
UCS-FI-6454	Configured model: UCS 6454 1RU Fabric Interconnect, with no PSU, with 54 ports and includes 18x10/25-Gbps and 2x40/100-Gbps port licenses

The base Cisco UCS 6454 Fabric Interconnects do not include the following components. They must be selected during product ordering:

- Power supplies
- Transceivers
- Cables
- Power cords
- Warranty Services

**NOTE:** Use the steps on the following pages to order the desired Fabric Interconnect with the configurable components that you want configured in your order.

### **STEP 2** CHOOSE PORT LICENSES (OPTIONAL)

The base unit comes with a number of pre-licensed ports. The base FI 6454 PID ships with 18x10/25-Gbps ports pre-licensed and 2x40/100-Gbps pre-licensed ports (you can choose which ports are pre-licensed). Licenses for additional ports are available as an optional PID. Ports 45-48 can also be part of the pre-license ports.

#### Select Port Licenses

The port license PIDs are shown in Table 10.

#### Table 10 Port License PIDs

Product ID (PID)	Description
Licenses for 6454	
UCS-L-6400-25G	UCS 6454 ONLY Fabric Int 1 Port 10/25 Gbps/FC port license
UCS-L-6400-25G=	Spare, UCS 6454 ONLY Fabric Int 1 Port 10/25 Gbps/FC port license
UCS-L-6400-25GC	UCS 6454 ONLY Fabric Int 1 Port 10/25 Gbps/FC port license C-direct only (Used to connect directly from FI 6454 to C220, C240, C460, C480, and/or C4200)
UCS-L-6400-25GC=	Spare, UCS 6454 ONLY Fabric Int 1 Port 10/25 Gbps/FC port license C-direct only (Used to connect directly from FI 6454 to C220, C240, C460, C480, and/or C4200)
UCS-L-6400-100G	UCS 6454 ONLY Fabric Int 1 Port 40/100 Gbps port license
UCS-L-6400-100G=	Spare, UCS 6454 ONLY Fabric Int 1 Port 40/100 Gbps port license

#### Supported Configurations

Default port licensing is summarized in Table 11.

#### Table 11 Port Licensing Options

Physical Ports	Pre-Licensed Ports	Optional Additional Licensed Ports
54	18 SFP28 ports	30 SFP28 ports
	2 QSFP28 Ports	4 QSFP28 Ports
	-	54 18 SFP28 ports

#### Caveats

■ Any additional license must be added for every port added beyond the quantity 20 pre-licensed ports.

Additional licensed ports can be located in any desired physical location (however, fibre channel ports must be physically co-located)

### **STEP 3** CHOOSE TRANSCEIVERS (OPTIONAL)

The Cisco UCS 6454 supports a wide variety of 10/25/40/100 Gigabit Ethernet connectivity options using Cisco 10/25/40/100 Gbps modules. Unified ports (UP) on the Cisco UCS 6454 support 10/25 Gigabit Ethernet connectivity or 8/16/32 Gigabit Fibre Channel modules.

#### **Choose Transceivers**

The supported transceivers are for the UCS-FI-6454 are listed in Table 12.

Product ID (PID)	Description		
SFP 1-Gigabit Transceivers <sup>1</sup>			
GLC-TE	1000 BASE-T SFP transceiver module for Category 5 copper wire		
GLC-SX-MMD	1000BASE-SX short wavelength; with DOM		
SFP-GE-T	1000 BASE-T SFP transceiver module for Category 5 copper wire, extended operating temperature range (supported but EOL)		
SFP+ 10-Gbps Transcei	vers		
SFP-10G-SR	10GBASE-SR SFP Module		
SFP-10G-SR-S	10GBASE-SR SFP Module, Enterprise-Class		
SFP-10G-LR	10GBASE-LR SFP Module		
SFP-10G-LR-S	10GBASE-LR SFP Module, Enterprise-Class		
SFP-10G-LRM	10GBASE-LRM SFP Module		
SFP-10G-ER	10GBASE-ER SFP Module		
SFP-10G-ER-S	10GBASE-ER SFP Module, Enterprise-Class		
SFP-10G-ZR	Cisco 10GBASE-ZR SFP10G Module for SMF		
SFP-10G-ZR-S	10GBASE-ZR SFP Module, Enterprise-Class		
FET-10G	10G Line Extender for FEX		
SFP+ 25-Gbps Transcei	SFP+ 25-Gbps Transceivers		
SFP-25G-SR-S	25GBASE-SR SFP Module		
QSFP+ 40G Transceivers			
QSFP-40G-SR4	40GBASE-SR4 QSFP Transceiver Module with MPO Connector		
QSFP-40G-SR4-S	40GBASE-SR4 QSFP Transceiver Module, MPO Conn, Enterprise-Class		
QSFP-40G-SR-BD	40GBASE-SR-BiDi, duplex MMF (LC)		

#### Table 12 UCS-FI-6454 Supported Transceivers (continued)

Product ID (PID)	Description	
QSFP-40G-LR4	QSFP 40GBASE-LR4 OTN Transceiver, LC, 10KM	
QSFP-40G-LR4-S	QSFP 40GBASE-LR4 Transceiver Module, LC, 10km, Enterprise-Class	
QSFP-40G-ER4	QSFP 40GBASE-ER4 Transceiver Module, LC, 40KM	
WSP-Q40GLR4L	QSFP 40G Ethernet - LR4 Lite, LC, 2KM	
QSFP28 100G Transcei	vers	
QSFP-100G-SR4-S	100GBASE SR4 QSFP Transceiver, MPO, 100m over OM4 MMF	
QSFP-100G-LR4-S	100GBASE LR4 QSFP Transceiver, LC, 10km over SMF	
SFP+ 10G Copper Cable	es with Integrated Transceivers	
SFP-H10GB-CU1M	10GBASE SFP+ Cable 1 Meter, passive	
SFP-H10GB-CU1-5M	10GBASE SFP+ Cable 1.5 Meter, passive	
SFP-H10GB-CU2M	10GBASE SFP+ Cable 2 Meter, passive	
SFP-H10GB-CU2-5M	10GBASE SFP+ Cable 2.5 Meter, passive	
SFP-H10GB-CU3M	10GBASE SFP+ Cable 3 Meter, passive	
SFP-H10GB-CU5M	10GBASE SFP+ Cable 5 Meter, passive	
SFP-H10GB-ACU7M	10GBASE SFP+ Cable 7 Meter, passive	
SFP-H10GB-ACU10M	10GBASE SFP+ Cable 10 Meter, passive	
SFP-10G-AOC1M	10GBASE Active Optical SFP+ Cable, 1M	
SFP-10G-AOC2M	10GBASE Active Optical SFP+ Cable, 2M	
SFP-10G-AOC3M	10GBASE Active Optical SFP+ Cable, 3M	
SFP-10G-AOC5M	10GBASE Active Optical SFP+ Cable, 5M	
SFP-10G-AOC7M	10GBASE Active Optical SFP+ Cable, 7M	
SFP-10G-AOC10M	10GBASE Active Optical SFP+ Cable, 10M	
SFP28 25G Copper Cables with Integrated Transceivers		
SFP-H25G-CU1M	25GBASE-CU SFP28 Cable 1 Meter	
SFP-H25G-CU2M	25GBASE-CU SFP28 Cable 2 Meter	
SFP-H25G-CU3M	25GBASE-CU SFP28 Cable 3 Meter	
SFP-H25G-CU5M	25GBASE-CU SFP28 Cable 5 Meter	
SFP-25G-AOC1M	25GBASE Active Optical SFP28 Cable, 1M	
SFP-25G-AOC2M	25GBASE Active Optical SFP28 Cable, 2M	

Product ID (PID)	Description
SFP-25G-AOC3M	25GBASE Active Optical SFP28 Cable, 3M
SFP-25G-AOC5M	25GBASE Active Optical SFP28 Cable, 5M
SFP-25G-AOC7M	25GBASE Active Optical SFP28 Cable, 7M
SFP-25G-AOC10M	25GBASE Active Optical SFP28 Cable, 10M
QSFP 40G Cables with	n Integrated Transceivers
QSFP-H40G-CU1M	40GBASE-CR4 Passive Copper Cable, 1m
QSFP-H40G-CU3M	40GBASE-CR4 Passive Copper Cable, 3m
QSFP-H40G-CU5M	40GBASE-CR4 Passive Copper Cable, 5m
QSFP-H40G-ACU7M	40GBASE-CR4 Active Copper Cable, 7m
QSFP-H40G-ACU10M	40GBASE-CR4 Active Copper Cable, 10m
QSFP-H40G-AOC1M	40GBASE Active Optical Cable, 1m
QSFP-H40G-AOC2M	40GBASE Active Optical Cable, 2m
QSFP-H40G-AOC3M	40GBASE Active Optical Cable, 3m
QSFP-H40G-AOC5M	40GBASE Active Optical Cable, 5m
QSFP-H40G-AOC10M	40GBASE Active Optical Cable, 10m
QSFP-H40G-AOC15M	40GBASE Active Optical Cable, 15m
QSFP28 100G Cables	with Integrated Transceivers
QSFP-100G-CU1M	100GBASE-CR4 Passive Copper Cable, 1m
QSFP-100G-CU2M	100GBASE-CR4 Passive Copper Cable, 2m
QSFP-100G-CU3M	100GBASE-CR4 Passive Copper Cable, 3m
QSFP-100G-AOC1M	100GBASE QSFP Active Optical Cable, 1m
QSFP-100G-AOC2M	100GBASE QSFP Active Optical Cable, 2m
QSFP-100G-AOC3M	100GBASE QSFP Active Optical Cable, 3m
QSFP-100G-AOC5M	100GBASE QSFP Active Optical Cable, 5m
QSFP-100G-AOC7M	100GBASE QSFP Active Optical Cable, 7m
QSFP-100G-AOC10M	100GBASE QSFP Active Optical Cable, 10m
QSFP-100G-AOC15M	100GBASE QSFP Active Optical Cable, 15m
QSFP-100G-AOC20M	100GBASE QSFP Active Optical Cable, 20m
QSFP-100G-AOC25M	100GBASE QSFP Active Optical Cable, 25m

Table 12 UCS-FI-6454 Supported Transceivers (continued)

#### Table 12 UCS-FI-6454 Supported Transceivers (continued)

Product ID (PID)	Description		
QSFP-100G-AOC30M	100GBASE QSFP Active Optical Cable, 30m		
Fibre Channel Transceivers			
DS-SFP-FC8G-SW	8 Gbps Fibre Channel SW SFP+, LC (supported but EOL)		
DS-SFP-FC8G-LW	8 Gbps Fibre Channel LW SFP+, LC (supported but EOL)		
DS-SFP-FC16G-SW	16 Gbps Fibre Channel SW SFP+, LC		
DS-SFP-FC16G-LW	16 Gbps Fibre Channel LW SFP+, LC		
DS-SFP-FC32G-SW	32 Gbps Fibre Channel SW SFP+, LC		
DS-SFP-FC32G-LW	32 Gbps Fibre Channel LW SFP+, LC		

#### Notes

1. Only ports 45-48 support 1G optics

#### Supported Configurations

- Select as many transceivers as you have licenses (see CHOOSE PORT LICENSES (OPTIONAL) on page 12).
- Fibre channel ports must be physically colocated in to allow them to be selected using the UCS Manager software GUI.

#### Caveats

 The maximum length of fiber optic runs is limited to 300 meters. This is imposed by our use of 802.3X/802.1Qbb Priority Pauses.

### NOTE:

Transceiver modules and cables that are supported on a specific Fabric Interconnect are not always supported on all VIC adapters, IOMs, or FEXs that are compatible with that Fabric Interconnect. Detailed compatibility matrices for the transceiver modules are available here: https://www.cisco.com/c/en/us/support/interfaces-modules/transceiver-modules/produ cts-device-support-tables-list.html

■ S-Class transceivers, for example: QSFP-40G-SR4-S, do not support FCoE.

### STEP 4 CHOOSE POWER SUPPLIES

The Cisco UCS 6454 Fabric Interconnects use AC or DC power supplies.

#### **Choose Power Supplies**

The supported power supplies for the Cisco UCS 6454 series Fabric Interconnects are listed in *Table 13*. FI 6454 uses the same power supplies as FI 6300 series.

#### Table 13 Supported Power Supplies and fan Module

Product ID (PID)	Description		
Power Supplies			
UCS-PSU-6332-AC	UCS 6332/6454 Power Supply/100-240VAC (650 W)		
UCS-PSU-6332-AC=	Spare, UCS 6332/6454 Power Supply/100-240VAC (650 W)		
UCS-PSU-6332-DC	UCS 6332/6454 Power Supply/-48VDC (930 W)		
UCS-PSU-6332-DC=	Spare, UCS 6332/6454 Power Supply/-48VDC (930 W)		

#### Supported Configurations

(1) You must choose two identical power supplies (either two AC power supplies or two DC power supplies).

(2) If you select DC power supplies, you must also select two DC power cords (CAB-48DC-40A-8AWG). See *Table 15 on page 18*.

#### Caveats

You cannot mix power supply types.

#### 6454 FI Fan Module

6454 Fabric interconnect comes with Four variable speed fans, 3+1 redundant (hot swappable)

#### Table 14 6454 FI Fan Module

Product ID (PID)	Description
UCS-FAN-6332	UCS 6332/6454 Fan Module

### **STEP 5** SELECT AC POWER CORDS

Select the appropriate AC power cords listed in *Table 15*. You must select two identical power cords. If you select the option R2XX-DMYMPWRCORD, no power cord is shipped with the server.

Product ID (PID)	PID Description	Images
R2XX-DMYMPWRCORD	No power cord (dummy PID to allow for a no power cord option)	Not applicable

1. A minimum of two DC power cables must be selected.

### STEP 6 ACCESSORY KIT (INCLUDED)

An accessory kit is included for either of the Cisco UCS 6454 Fabric Interconnects.

#### **Choose Accessory Kit**

The supported accessory kit for the Cisco UCS 6454 Fabric Interconnects is listed in *Table 16*. FI 6454 uses the same accessory kit as FI 6300 series.

#### Table 16 Accessory Kit

Product ID (PID)	Description
UCS-ACC-6332	UCS 6332/6454 Chassis Accessory Kit
UCS-ACC-6332=	Spare, UCS 6332/6454 Chassis Accessory Kit

For details regarding the accessory kits, see *Cisco UCS 6454 (Supported speed matrix) on page 30*.

### STEP 7 CHOOSE SERVICE AND SUPPORT LEVEL

A variety of service options are available, as described in this section.

#### Unified Computing Warranty, No Contract

If you have noncritical implementations and choose to have no service contract, the following coverage is supplied:

- Three-year parts coverage.
- Next business day (NBD) onsite parts replacement eight hours a day, five days a week.
- 90-day software warranty on media.
- Ongoing downloads of BIOS, drivers, and firmware updates.
- UCSM updates for systems with Unified Computing System Manager. These updates include minor enhancements and bug fixes that are designed to maintain the compliance of UCSM with published specifications, release notes, and industry standards.

#### Smart Net Total Care (SNTC) for UCS

For support of the entire Unified Computing System, Cisco offers the Cisco Smart Net Total Care for UCS Service. This service provides expert software and hardware support to help sustain performance and high availability of the unified computing environment. Access to Cisco Technical Assistance Center (TAC) is provided around the clock, from anywhere in the world

For systems that include Unified Computing System Manager, the support service includes downloads of UCSM upgrades. The Cisco Smart Net Total Care for UCS Service includes flexible hardware replacement options, including replacement in as little as two hours. There is also access to Cisco's extensive online technical resources to help maintain optimal efficiency and uptime of the unified computing environment. For more information please refer to the following url: <a href="http://www.cisco.com/c/en/us/services/technical/smart-net-total-care.html?stickynav=1">http://www.cisco.com/c/en/us/services/technical/smart-net-total-care.html?stickynav=1</a>

You can choose a desired service listed in *Table 17*.

#### Smart Net Total Care for Cisco UCS Onsite Troubleshooting Service

An enhanced offer over traditional Smart Net Total Care which provides onsite-troubleshooting expertise to aid in the diagnostics and isolation of hardware issue within our customers' Cisco Unified Computing System (UCS) environment. It is delivered by a Cisco Certified field engineer (FE) in collaboration with remote TAC engineer and Virtual Internet working Support Engineer (VISE). You can choose a desired service listed in *Table 18*

#### Solution Support for UCS

Solution Support includes both Cisco product support and solution-level support, resolving complex issues in multivendor environments, on average, 43% more quickly than product support alone. Solution Support is a critical element in data center administration, to help rapidly resolve any issue encountered, while maintaining performance, reliability, and return on investment.

This service centralizes support across your multivendor Cisco environment for both our products and solution partner products you've deployed in your ecosystem. Whether there is an issue with a Cisco or solution partner product, just call us. Our experts are the primary point of contact and own the case from first call to resolution. For more information please refer to the following url:

http://www.cisco.com/c/en/us/services/technical/solution-support.html?stickynav=1 You can choose a desired service listed in *Table 19*

#### Smart Net Total Care for UCS Hardware Only Service

For faster parts replacement than is provided with the standard Cisco Unified Computing System warranty, Cisco offers the Cisco Smart Net Total Care for UCS Hardware Only Service. You can choose from two levels of advanced onsite parts replacement coverage in as little as four hours. Smart Net Total Care for UCS Hardware Only Service provides remote access any time to Cisco

support professionals who can determine if a return materials authorization (RMA) is required. You can choose a desired service listed in *Table 20*

#### Partner Support Service for UCS

Cisco Partner Support Service (PSS) is a Cisco Collaborative Services service offering that is designed for partners to deliver their own branded support and managed services to enterprise customers. Cisco PSS provides partners with access to Cisco's support infrastructure and assets to help them:

- Expand their service portfolios to support the most complex network environments
- Lower delivery costs
- Deliver services that increase customer loyalty

PSS options enable eligible Cisco partners to develop and consistently deliver high-value technical support that capitalizes on Cisco intellectual assets. This helps partners to realize higher margins and expand their practice.

PSS is available to all Cisco PSS partners.

The two Partner Unified Computing Support Options include:

Partner Support Service for UCS Hardware Only

PSS for UCS provides hardware and software support, including triage support for third party software, backed by Cisco technical resources and level three support. You can choose a desired service listed in *Table 21*.

#### Table 21 PSS for UCS (PID UCSC-FI-6454)

#### **Unified Computing Combined Support Service**

Combined Services makes it easier to purchase and manage required services under one contract. SNTC services for UCS help increase the availability of your vital data center infrastructure and realize the most value from your unified computing investment. The more benefits you realize from the Cisco Unified Computing System (Cisco UCS), the more important the technology becomes to your business. These services allow you to:

- Optimize the uptime, performance, and efficiency of your UCS
- Protect your vital business applications by rapidly identifying and addressing issues
- Strengthen in-house expertise through knowledge transfer and mentoring
- Improve operational efficiency by allowing UCS experts to augment your internal staff resources
- Enhance business agility by diagnosing potential issues before they affect your operations,

You can choose a desired service listed in *Table 23*.

#### Table 23 Combined Support Service for UCS (PID UCSC-FI-6454)

#### **UCS Drive Retention Service**

With the Cisco Unified Computing Drive Retention Service, you can obtain a new disk drive in exchange for a faulty drive without returning the faulty drive.

Sophisticated data recovery techniques have made classified, proprietary, and confidential information vulnerable, even on malfunctioning disk drives. The Drive Retention service enables you to retain your drives and ensures that the sensitive data on those drives is not compromised, which reduces the risk of any potential liabilities. This service also enables you to comply with regulatory, local, and federal requirements.

If your company has a need to control confidential, classified, sensitive, or proprietary data, you might want to consider one of the Drive Retention Services listed in the above tables (where available)

**NOTE:** Cisco does not offer a certified drive destruction service as part of this service.

Local Language Technical Support for UCS

Where available, and subject to an additional fee, local language support for calls on all assigned severity levels may be available for specific product(s) - see tables above.

For a complete listing of available services for Cisco Unified Computing System, see this URL: http://www.cisco.com/en/US/products/ps10312/serv\_group\_home.html

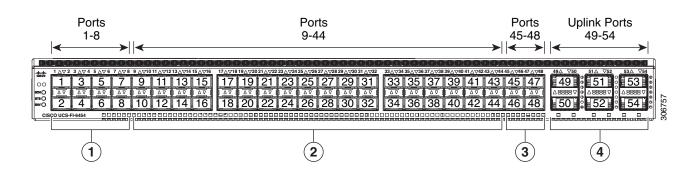

# SUPPLEMENTAL MATERIAL

### Cisco UCS 6454 Port Numbering

Each port on the Cisco UCS 6454 is numbered, and groups of ports are numbered based on their function. The ports are numbered top to bottom and left to right.

*Figure 7* shows how ports are numbered and the table below explains how each port group functions.

#### Figure 7 Port Numbering of the Cisco UCS 6454

1	Ports 1—8 are Universal ports (operate either as 10/25 Gbps SFP28 fixed Ethernet or as 8/16/32 Gbps Fibre channel)	2	Ports 9-44 operate as 10/25 Gbps SFP28 Ethernet/FCoE ports.
3	Port 45-48 (operate as 1/10/25 Gbps SFP28 Ethernet/FCoE ports)	4	Port 49-54 (operate as 40/100 Gbps QSFP28 Ethernet/FCoE ports) <sup>1</sup>

Notes

1. Ports 49–54 can only be used to connect to network or FCoE uplink ports and not UCS server ports. These ports do not support breakout cables or QSA module.

### Cisco UCS 6454 (Supported speed matrix)

Speed	Port Range				
speed	1-8	9-44	45-48	49-54	
1 Gbps	No	No	Yes	No	
10/25 Gbps	Yes	Yes	Yes	No	
40/100 Gbps	No	No	No	Yes	
8/16/32 Gbps FC	Yes	No	No	No	

### **Accessory Kit**

The Cisco UCS 6454 Fabric Interconnect accessory kit includes the following items:

- 2 slider rails
- 2 rack-mount guides
- 2 rack-mount brackets
- 12 M4 x 0.7 x 8-mm Phillips countersunk screws
- 10 10-32 rack nuts
- 10 10-32 x 3/4-inch Phillips pan-head screws
- 1 console cable with an RJ-45-RS-232 adapter and a DB9 adapter
- 1 ground lug kit
- 1 ESD wrist strap
- 1 power cord clip (a wire clip that is used to retain the power cord)
- 1 pointer document (specifies where to find the online product documentation)

## **LED Descriptions**

Table 24 describes the LEDs for the Cisco UCS 6454 fabric interconnect.

Table 24	Cisco UCS	6454 Fabric	Interconnect	LED	Descriptions

Fan Module LED						
Fan status	Front	Fan tray health	Green	On	Normal operation	
			Amber	On	Fan failure has occurred within the fan tray	

### Connectivity

This section explains the connectivity between the Fabric Interconnects (FIs) and Fabric Extenders (FEX). The Fabric Extenders are extensions of the Fabric Interconnects and act as remote line cards to form a distributed modular fabric system. The fabric extension is accomplished through the FEX fabric link, which is the connection between the Fabric Interconnect and the FEX.

A minimum of one connection between the FI and FEX is required to provide server connectivity. Depending on the FEX model, subsequent connections can be up to eight links, which provides added bandwidth to the servers.

### 5108 Blade Chassis Server Connectivity

For the 5108 blade chassis, the Fabric Extender modules (up to two) plug into the back of the UCS 5108 series blade server chassis. A midplane connects the blade servers to the Fabric Extenders. The 5108 chassis accommodates the following FEXs:

Cisco UCS 2208XP

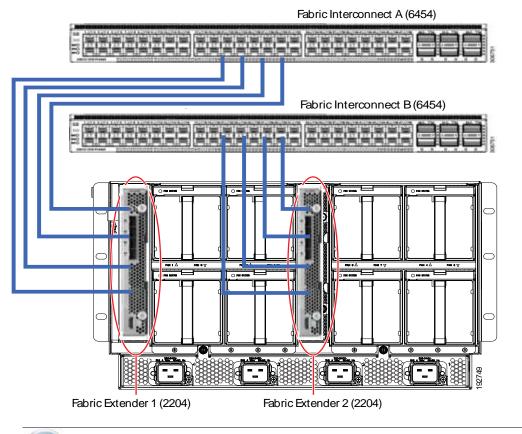

Figure 8 shows how the FEX modules in the blade chassis connect to the FIs.

Figure 8 Connecting Blade Chassis Fabric Extenders to Fabric Interconnect Chassis

NOTE: Cisco UCS 5108 rev 1 and rev 2 chassis are both supported with FI 6454.

### C-Series Rack-Mounted Server Connectivity

C-Series servers connect to external FEXs and FIs as summarized in this section. Two interconnection methods are possible:

- Single-Wire Management
- Dual-Wire Management

#### Single-Wire Management

Cisco UCS Manager 3.1 supports an additional option to integrate the C-Series Rack-Mount Server with Cisco UCS Manager using the NCSI. This option enables Cisco UCS Manager to manage the C-Series Rack-Mount Servers using a single-wire for both management traffic and data traffic. When you use the single-wire management mode, one host facing port on the FEX is sufficient to manage one rack-mount server, instead of the two ports you would use in the Shared-LOM mode. This connection method allows you to connect more rack-mount servers with Cisco UCS Manager 3.1 for integrated server management. Make sure you have correct server firmware for integration with Cisco UCS Manager. If not, upgrade your server firmware before integrating the server with Cisco UCS Manager.

*Figure 9* shows how the C-Series rack mount chassis connect to the FEXs and FIs for single-wire management.

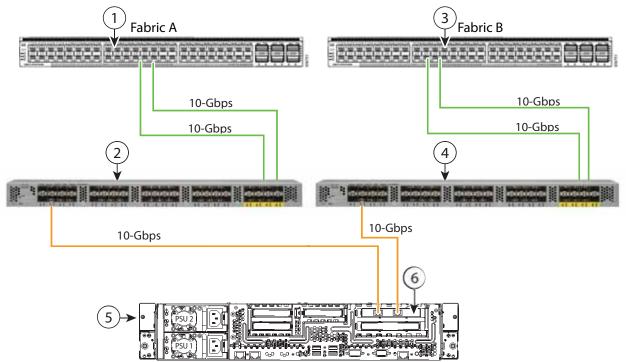

Figure 9 Connecting C-Series Rack Chassis (single-wire management)

1	Cisco UCS 6454 FI (Fabric A)	4	Cisco Nexus 2232PP, 2232TM-E, or 2348UPQ (Fabric B)
2	Cisco Nexus 2232PP, 2232TM-E, or 2348UPQ (Fabric A)	5	Cisco UCS C-series M5 server
3	Cisco UCS 6454 FI (Fabric B)	6	Cisco UCS VIC 1445 in PCIe slot 1

#### Dual-Wire Management

Cisco UCS Manager version 3.1 supports the existing rack server integration and management option through Shared LOM, using two separate cables for data traffic and management traffic. The prerequisites for integration with Cisco UCS Manager are built into the C-Series servers. Make sure you have correct server firmware for integration with Cisco UCS Manager. If not, upgrade your server firmware before integrating the server with Cisco UCS Manager.

*Figure 10* shows how the C-Series rack mount chassis connect to the FEXs and FIs for dual-wire management.

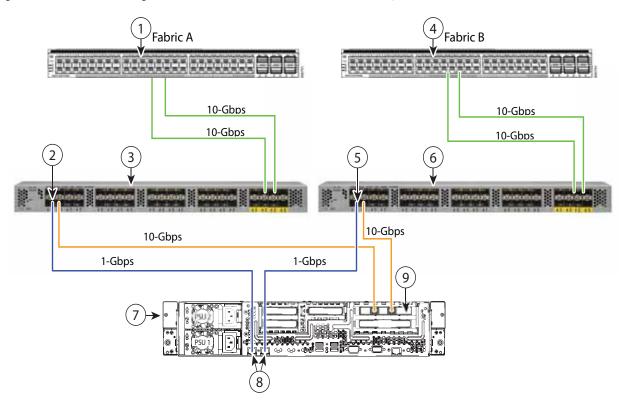

Figure 10 Connecting C-Series Rack Chassis (dual-wire management)

1	Cisco UCS FI 6454 (Fabric A)	6	Cisco Nexus 2232PP (Fabric B)
2	10GBase-T RJ-45 in Nexus 2232PP (Fabric A)	7	Cisco UCS C-series M5 server
3	Cisco Nexus 2232PP (Fabric A)	8	10-Gbps Ethernet LOM ports
4	Cisco UCS FI 6454 (Fabric B)	9	10-Gbps Adapter card in PCIe slot 1
5	10GBase-T RJ-45 in Nexus 2232PP (Fabric B)	-	_

**NOTE:** In addition to supporting single wire management and dual wire management, FI 6454 also supports direct connection to C-Series.

### **Blade Chassis Connection Types**

In a blade chassis, the FEX fabric link (the link between the FEX and the FI) supports different types of connections:

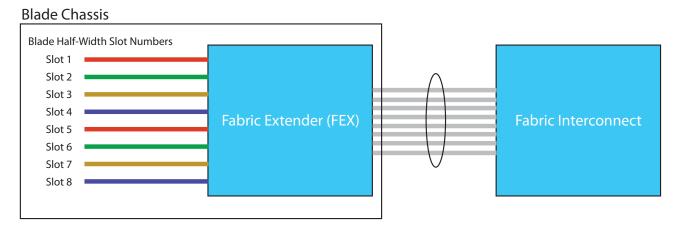

Port Channel Mode

Table 25 shows the mapping from the blade chassis server half slots to the FEX fabric links.

<b>FEX Туре</b>	Number of FEX Fabric Links	Half-Width Server Slot to Link
	1	Server Slots 1 - 8 merged to link 1
	2	Server Slots 1, 3, 5, 7 merged to link 1
		Server Slots 2, 4, 6, 8 merged to link 2
Cisco UCS 2208XP, and	4	Server Slots 1, 5 merged to link 1
Cisco UCS 2204XP		Server Slots 2, 6 merged to link 2
		Server Slots 3, 7 merged to link 3
		Server Slots 4, 8 merged to link 4
Cisco UCS 2208XP only	8	1:1 mapping. Each half-width server slot is pinned to a single FEX fabric link.

In port channel mode, the FEX fabric links are bundled into a single logical link (see *Figure 11*) to provide higher bandwidth to the servers. Depending the FEX, up to 8 links can be port-channeled.

Figure 11 FEX Fabric Links in Port Channel Mode

# **TECHNICAL SPECIFICATIONS**

# **Physical and Environmental Specifications**

Table 26	Physical ar	nd Environmental	<b>Specifications</b>
			••••••••••••••

Description	Specification		
Cisco UCS 6454 FI			
Dimensions (H x W x D)	1.72 in. x 17.3 in x 22.5 in (4.4 cm x 43.9 cm x 57.1 cm)		
Weight (with two power supplies and two expansion modules installed)	22.24 lb (10.10 kg)		
Environmental			
Temperature, operating	32 to 104°F (0 to 40°C)		
Temperature, non-operating	-40 to 158°F (-40 to 70°C)		
Humidity (RH), non-condensing	5 to 95%		
Altitude	0 to 13,123 ft (0 to 4000 m)		

# **Power Supply Specifications**

AC Power Supply Properties	Description		
Maximum AC input current	7.6 A @ 100 VAC		
	3.65 A @ 208 VAC		
Maximum input VA	760 VA		
Maximum output per power supply	650 W		
Maximum inrush current	11 A peak at +35 degrees C @208 VAC		
Maximum holdup time	12 ms @50% load		
Power supply output voltage	12 VDC		
Power supply standby voltage	12 VDC		
Efficiency rating	Climate Savers Platinum Efficiency (80Plus Platinum Certified)		
Form factor	10		
Input connector	IEC320 C14		

Table 27 Specifications for the Cisco UCS 6454 AC Power Supply (UCS-PSU-6332-AC)

Table 28	Specifications	for the Cisco	UCS 6454	DC Power S	Supply (UCS-PSU	-6332-DC)
	specifications		00000404	DCTOWCI 5	uppiy (005-150	0332-00)

DC Power Supply Properties	Description
Maximum AC input current	23 A @ -48 VDC
Maximum input VA	1104 VA
Maximum output per power supply	930 W
Maximum inrush current	35 A Peak at +35 degree C
Maximum holdup time	8 ms @50% load
Power supply output voltage	12 VDC
Power supply standby voltage	12 VDC
Efficiency rating	Climate Savers Platinum Efficiency (80Plus Platinum Certified)
Form factor	10
Input connector	Molex: 445401-1001
