
Product Information

Overview

Use the Lightning to VGA Adapter with your iPhone, iPad, or iPod with Lightning connector. The Lightning to VGA Adapter supports mirroring of what is displayed on your device screen — including apps, presentations, websites, slideshows, and more — to your VGA-equipped TV, display, projector, or other compatible display in up to 1080p HD.

It also outputs video content — movies, TV shows, captured video — to your big screen in up to 1080p HD. Simply attach your Lightning to VGA Adapter to the Lightning connector on your device and then to your TV or projector via a VGA cable (sold separately).

What's in the Box

Lightning to VGA Adapter

System Requirements

Requires a VGA cable (sold separately) for connection to your TV or projector.
Does not support audio output.
