

SC100 ENCRYPTED USB 3.0 DRIVE

The **SC100** is a secure and affordable, password protected, 256-bit AES hardware encrypted USB 3.0 drive using XTS mode to provide always-on enterprise grade protection for your data.

An epoxy coating on the controller and flash memory protects against water, dust, and physical intrusion. Unlike software based encryption the SC100 does not export encryption keys to the host PC, protecting against cold-boot and malware attacks.

Compatible with SafeConsole, a secure cloud or on-premise management platform, your organisation can optionally centrally manage the SC100 giving you additional control and audit capabilities.

Origin Storage SC100 SafeConsole Ready Encrypted 256-bit AES USB 3.0 Key

Capacity	Code
4GB	SC100-4GB
8GB	SC100-8GB
16GB	SC100-16GB
32GB	SC100-32GB
64GB	SC100-64GB

Solutions you can rely on

SPECIFICATIONS

Capacity	4GB, 8GB, 16GB, 32GB, 64GB
Encryption	256-bit AES - XTS mode
Dimensions	55mm x 17mm x 8mm (L x W x D)
Weight	26 grams
Interface	USB 3.0 (2.0 compatible)
Standards	RoHS Compliant, FCC, CE & WEEE
OS Support	Windows 7 (SPI)+, Mac OS 10.9+ & Linux 32/64bit (Kernel 2.6+)
Warranty	2 Years
Management	Standalone or SafeConsole Managed

KEY FEATURES

-  Unlock in read-only mode to prevent files from being modified or infected with malware
-  Automatic hardware encryption using AES 256-bit XTS encryption
-  Initiate reset sequence after 10 consecutive incorrect password attempts and return to factory settings
-  Optional management with SafeConsole provides remote password reset, remote wiping, and more
-  No software installation or admin rights required
