

Small and powerful door security

AXIS I8116-E Network Video Intercom

This compact and powerful network video intercom operates as a communication device and security camera, providing 5MP video, two-way communication, and remote entry control.

Open standards such as ONVIF and Session Initiation Protocol (SIP) combined with its small size enables unique opportunities for system design and integration. WDR and efficient noise cancellation ensure performance in demanding situations, such as strong backlight or surrounding noise. It's also possible to wire an OSDP reader to the IO connector for trouble-free access control using Axis access control solutions. Furthermore, it comes with AXIS Object Analytics preinstalled, and built-in cybersecurity features help prevent unauthorized access.

- > **Mullion form factor**
- > **High quality 5 MP video with audio**
- > **SIP support**
- > **Support for analytics based on deep learning**
- > **Built-in cybersecurity features**
