

## WLAN Camera

00176614 Surveillance Camera with Light and Motion Detector, WLAN, for Outdoors, 108

### Highlightstext:

- With the surveillance camera, monitor and illuminate outdoor areas such as the house, courtyard, garden, patio or garage via app and voice control and create a secure and comfortable home with alarm scenarios, for example in combination with other Smart Home products
- Our surveillance camera works without any gateway (hub): you don't need an additional device, and you save on extra costs since the camera establishes a direct WiFi connection with the router
- Whether it be the sofa or the sun lounger: with the Hama Smart Home app and WLAN camera, you have control over your property, garden and front door at all times, no matter where you are
- Whether it be Amazon Alexa or Google Assistant: simply display the live image from the WLAN outdoor camera on devices with a screen using voice controls
- WLAN surveillance camera responds to movements: if the camera detects movement, you can be notified via push notification, automatically trigger recording or switch on the integrated floodlight
- Outdoor camera for day and night: the integrated floodlight replaces and improves the existing outdoor lighting with its powerful effect - also allowing even more detailed surveillance of yards, gardens, plots of land and stables
- Detailed images in the dark: during the night, infra-red night vision means you can still rely on camera surveillance as it works independently of the integrated light
- Always track what's happening in front of the camera: when movement is detected, video recording starts automatically - either save locally to micro-SD cards up to 128 GB or to a chargeable cloud account, ensuring no recorded material is lost
- 2-way audio: a microphone and speaker allows communication via the WLAN outdoor camera, e.g. over a mobile phone with the postman, even when you're not at home
- Razor-sharp images: whoever is creeping around your property, with images from the outdoor camera in Full HD 1080p, you'll spot everything and everyone
- Step by step to the Smart Home: with the Hama Smart Home app, you can expand and network your smart home with any number of Hama Smart Home products
- Simple installation on your own WiFi network: since no hub is required, your devices can be set up in just a few minutes
- High compatibility: works with Amazon Alexa, Google Assistant, Amazon Echo Show and Google Nest Hub, iOS and Android. Can also be connected to all Alexa and Google Assistant-compatible smart home products from other manufacturers
- The perfect start: the WLAN surveillance camera is ideal for intelligently upgrading apartments or houses
- Link PIR motion detection with the floodlight: to scare intruders away, for better recognition and for lighting, for example when you're driving the car on your property or entering the garden gate
- Live view: monitor with real-time video what's happening around the house or garden
- Audio detection with 2-stage adjustable sensitivity (high/low): When there is a sound, the WLAN camera sends a push notification to the smartphone
- For outdoors (IP 65): protected against water jets, the outdoor camera can be attached without concern and discreetly to façades
- Multi-user functionality: multiple users can access the outdoor camera at the same time - handy when you're on holiday, for example
- The security camera can be used to deter burglary and vandalism, but also to watch over children playing in the garden, pets or horse stables
- Your data is stored exclusively on German servers

### System Requirements:

- Operating system: Android 4.4 and iOS 8.0 or later

### Note for Consumers:

#### Amazon Alexa/Google Assistant:

To do this, the Alexa skill "Hama Smart Home" must have been activated in the Alexa App/"Hama Smart Home" service must have been activated in the Google Home App. The user account for the Hama Smart Home app is then connected Alexa / Google.

It allows the video display of the WiFi camera to be shown when an Amazon / Google loudspeaker with screen is being used.

## WLAN Camera

00176614 Surveillance Camera with Light and Motion Detector, WLAN, for Outdoors, 108

### Technical characteristics:

- Colour: Black
- Product Division: Home & Living
- Shade of colour: Black
- Signal Transmission: WiFi
- WLAN Standard: 802.11 n/g/b (150 Mbps/54 Mbps/11 Mbps)
- Frame rate: Max. 25 Pictures per Second
- Frequency Range: 2.4 GHz
- Memory Capacity: 128 GB
- Resolution: 1920 x 1080 (Full HD)
- Storage Medium: SD Card
- Wireless Encryption: WPA2
- Additional Functions: Night Light Function, Night vision
- Angle of coverage: 145 °
- IP protection class: IP54 (protection against dust and spray water)
- Integrated: Loudspeaker
- Sensors: Motion Sensor
- Special Feature: Built-In microphone
- Voice Assistant: Amazon Alexa (AVS), Apple Siri (Shortcuts), Google Home
- Depth: 17 cm
- Height: 29.5 cm
- Width: 18 cm
- Recommended Use: Home Assistent

### Delivery:

- 1 surveillance camera
- Mounting hardware
- 1 quick reference guide
