Patch Management
with TeamViewer Remote

Strengthen your security posture with automatic third-party software and OS vulnerability patching for Windows and macOS

Only one unpatched device puts your entire IT at risk

TeamViewer Remote provides you with an integrated solution to detect and patch vulnerable, outdated software. Keep your IT infrastructure up to date and safe by automatically evaluating and applying OS and 3rd party application patches.

Comprehensive & Intuitive

Patching doesn't have to be complicated. With TeamViewer Remote, you will not spend hours familiarizing yourself and your staff with an un-intuitive solution.

Benefit from a solution that is easy to use, yet comprehensive and agile. Quickly see the update statuses of your devices, and all available patches from one convenient location.

Operating System Updates
Keep your Windows and macOS devices up to date by managing and deploying Windows updates from a central location.

Custom Policies
Define individual policies to accommodate the varying needs of your end-users, entire departments, or different customers.
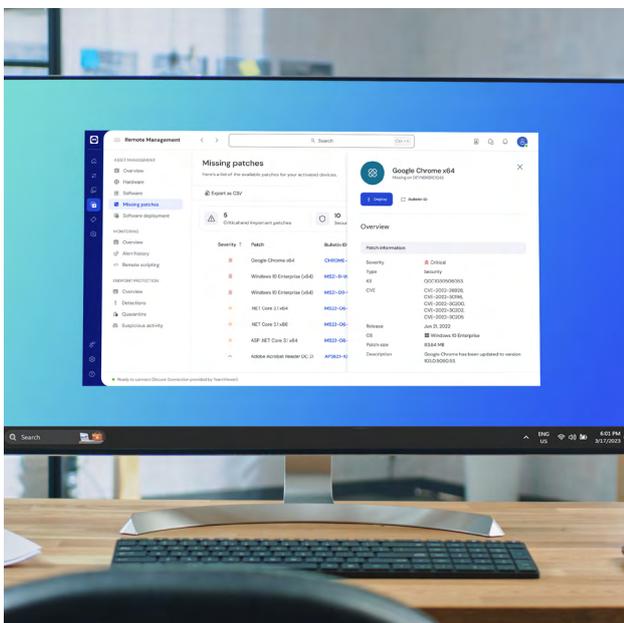

Third Party Applications
Don't put your IT at risk by only focusing on OS updates. Monitor and deploy patches for third party applications automatically.

Automation
Automate your patching process! Automatically detect and patch software and OS vulnerabilities.

Supported Third Party Applications

Scan or click the QR code to see the hundreds of supported third party applications.

Remote Support with TeamViewer

Increase your productivity, prevent downtime, and avoid unnecessary travel by solving IT problems remotely.

✔ Manage and support both attended and unattended devices from anywhere.
