Opportunities Workshop

Is your business presenting your IT with new challenges? Would you like to make your increasingly complex IT infrastructure more efficient and future-oriented? The Opportunities Workshop provides you with fundamental insights you need to further develop your business and IT in the long term and harmonize them with each other.

You will receive an external, independent and neutral assessment of your IT architecture. We look at the most important components of your company to develop concrete recommendations for action for a strategic alignment of your IT.

Let's create your future-proof IT architecture together!

Gain a transparent view of your existing overall IT architecture through structured interviews on relevant IT systems, IT applications and relevant IT processes. The goal is to show you a functional analysis and optimization measures. You receive valuable starting points for the strategic planning of your IT target architecture.

Your benefit

- ✓ Transparency about your IT architecture including external evaluation
- ✓ Results are a first step for your IT to support your business processes more efficiently
- ✓ Basis for a translation of current and future business requirements into IT
- ✓ Development of actions to increase IT performance

Optimal entry into optimization projects, digitalization projects, definition of IT strategy
