A lighter and more flexible construction makes this cable simple to install with cable trays and through conduits, whilst low RFI/EMI ensures that the cable can be installed in the most sensitive of environments. This device is fully compatible with, and can be used to extend signals from, 4K USB 3.1/3.0 webcams and video conferencing systems.

For added convenience the Fibre Optic USB 3.0 cable also features a USB Type A cable, which can be connected should additional power be required.
